Ucatone
UCATONE renews your appetite—makes you hungry—makes food taste better. It aids digestion—assisting the digestive organs in turning over their full quota of tissue building nourishment. You will feel better after taking UCATONE for only two or three days. The lax and lazy organs of the body take a new lease on life and before you know it you are rugged, active and cheerful again. Girls who are delicate and boys who are growing too fast need UCATONE just as much as over-worked run-down adults. Growing children should eat hearty, substantial food. UCATONE will encourage their appetite.

Ucatone
UCATONE is rich in Vitamins B and G—it also contains the concentrated nourishment of malt, the strengthening properties of iron and the invigorating power of full-bodied wine, together with other tonic ingredients. Everyone knows how essential vitamins are to sound body and a keen mind. Vitamins B and G are combined in UCATONE in just the right proportions to be assimilated by the under-nourished system.
