State College Hints to Farm Homemakers

One way of attaining a more successful home life is by the provision of a family council. Let all members of the household join in this council and meet once a week to discuss common problems. This will give anyone with a grievance an opportunity to bring it before the group, where it is usually ironed out with no difficulty.

A good dinner served amid peaceful surroundings and in an atmosphere of security is no small contribution to family life. Keep the table-talk constructive and mix with the baked beans and angel cake plenty of love, laughter, and understanding. Thus will the dinner hour be made a much-looked-forward-to event in your home.

After cutting fresh flowers from the garden, place in water almost to the blossoms. Insert scissors under water and cut off small portion of the stem. Keep stems under water until flowers become turgid and stand up well for artistic arranging.

Have you ever tried a little Chlorox in the water to keep it fresh and keep down the odor from decaying stems and leaves?

A little dry mustard or salt rubbed on the hands and then rinsed off will remove onion odors.

To remove onion or fish odors from pans in which those and other odiferous foods have been cooked, wash the pans in hot soapy water to which one or two tablespoons of vinegar have been added.

Farmers have increased their capacity to produce food to the highest levels in United States history and prospects are that they will produce even more in the future.
