Egg Custard **Old Standby**

Custard is an old-fashioned dessert, but it's always up-to-date. And up-to-date it is during the month of March which has been designated as March Egg Month.

Because custard is mostly milk and eggs, it's unusually high in protein for a dessert, thus deserves consideration for its nutritive value. Budgetwise, it's a good choice this month and during March Egg Month when the plentiful supply of eggs includes a large share of Grade AA and A eggs, also large size.

Recent research by U. S. Depart ment of Agriculture specialists indicate that plain custard has a rangements in keeping with the better flavor when made with high grade eggs.

Soft custard is easy to make and is a dessert that interests all ages at the family dinner table. Here's a recipe for soft custard
