So This Is New York

(Continued from page four)

left the train the next day. Soon among the students, a collection was started. When the refugees got off the train at Cincinnati, they had more than \$50. No wonder they like U. S.

Nothing is quieter than a Saturday in New York in the summer unless it is a Sunday. When the week-end comes here now, the people flee the hot town as if it were stricken by a plague. Many stores close, most offices are deserted and only the overhead and entertainment places remain open, with the personnel in these having a faraway look in their eyes. Truly the cool beaches, the woods and mountains house the New Yorkers for the week-ends in summer.

Gatham Gatherings: the carillon in Riverside Church has 72 bells, the largest of which weighs more

than 20 tons... a mid-town store has this sign: "Try our easy-payment plan, 100% down, nothing more to pay"... a local speaker said regarding speech-making: "First you acknowledge all the honored guests, then say, 'and ladies and gentlemen, making it sound as if all the others were bums'"... said-faced Lewis Mumford of the University of Pennsylvania declares that "Either the motor car will drive us out of our cities, or our cities will have to drive out the motor car in order to preserve other advantages of urban life"... one Congressman is said to have said, "Yes, I've given up smoking until the cancer scare blows over."

San Francisco—O quiet, middle-aged, well-dressed man entered an American Trust Company branch and held up a teller, escaping with \$753. He is believed by police to be the same man who has robbed thirteen other banks in the bay area since February 3, 1956—always on Friday afternoon.

People who can easily pay any price say:

"Pay more... what for? Ford's the buy!"

Why? Because this 1957 Ford gives you the advanced features, the solid ride, the effortless handling that you once expected to find only in expensive cars. And when it comes to looks, where can you find fresher styling than in the sculptured-in-steel lines of this new Ford?

Ford's superiority is evident in many places. In the vital rear axle, the pinion gear that turns the rear wheels is straddle-mounted... supported between two anti-friction bearings instead of being "overhung" from a single bearing. This makes operation quieter, smoother and longer-lasting. It's a feature that Ford shares with only one other car maker in the world—Rolls Royce.

Or consider Ford's famous V-8 engine. No other manufacturer in the industry today electronically balances every V-8 engine, while operating under its own power, the way that Ford does. This means you get a smoother-running engine—the finest V-8 in Ford's 25 years of V-8 leadership.

These are only a few of the important hidden values that are yours in Ford. But they indicate why so many people who can pay almost any price for a car—people who have driven expensive cars for years—are buying Ford today. Action Test this great performing car at your Ford Dealer's just once and you, too, will ask, "Pay more... what for?"

YOU CAN SPEND HUNDREDS MORE... BUT YOU CAN'T BUY BETTER THAN THE NEW KIND OF FORD
