In Fashion Now

Fashion swipes are becoming the order of the day. Consider the ease of Bermuda shorts, fisherman's pants—the girls have taken them for lounging and play. Take men's shirts, sister has been swiping big brother's and Dad's for several years now.

Another result of this trend is the popular little-boy shirts for girls. Shirt dresses made of broadcloth and oxford cloth have gone one step further. The latest shirt dress features buttoned-down tab collars and rolled-up sleeves.

The suburban set loves this look. They find it perfect for the activities in and out of the house. Career girls like the crisp tailored shirt dresses that launder like handkerchiefs. Casual clothes, with a bit of dash added, are popular with all ages.

It is smart, fashion-wise, to roll up your sleeves. This heavy trend to casual clothes is to be expected. The American way of life includes lots of outdoor activities. Cooking and entertaining outside has come to be a standard thing. The "do-it-yourself" craze is with us to stay. With all this came the upsurge of casual clothes for men and women.

It is said that the big difference in American versus European taste in dress is that American women would rather look smart than pretty. The British think we carry this to extreme. They use the example of the little black dress and the standard black suit found in almost every woman's wardrobe—even if black is not a becoming color.

It may be that American women give more attention to the choice of makeup, but it seems that most of them do look good in black. Almost anyone can, if the choice of makeup colors is right.
