MIRACLE WORKERS
Huntsville, Utah—The Orville Peterson family moved into their new home that took 15 volunteers only 5 hours to build.

What appeared to be a miracle—resulted in ordinary construction men putting together prefabricated sections to build the Peterson home.

Earlier the Peterson home had been shattered by an explosion that seriously injured 2 young sons. Money and construction materials were contributed by neighbors.

Q. A.

What are these Rural Electric Systems? . . .

They are businesses organized by groups of neighbors to provide themselves with electricity.

Why, you ask? . . . Well, because it was the only way folks in rural areas could get electricity. And the Members of a Rural Electric System are its owners, who elect the Directors, who in turn operate the business through a trained and experienced management staff . . .

The money to build the lines? . . . Borrowed from REA, sure, and being paid back, on schedule, and with interest . . . It's a good deal all around!

Gardenerettes Enjoy Picnic

The August meeting of the Gardenerettes Garden Club was the annual picnic held at the home of Mrs. David Spainhour on State Farm Road.

After the picnic supper on the lawn, members and guests were invited into the living room where a most interesting program on modern trends in flower arranging, Parabolic Curves, Abstracts, Mobiles, and Stables was presented by Mrs. L. E. Dimmette of Lenoir and Blowing Rock and Mrs. J. E. Thomas of Winston-Salem and Blowing Rock. Arrangements made by six of the members were evaluated. It was decided that one or more of the arrangements would be used in an up-town window the latter part of August.

After a question and answer period the meeting was adjourned.

Know The Weather

By E. H. SIMS
During your vacation to the beach or lake this summer an interesting past-time might be a study of the clouds day by day—and the conclusions you can draw from them.

For example, very high cirrus clouds will often indicate the approach of a warm front, which brings with it rain. But the higher the typical summer clouds cumulus separated white puffs moving gently along in a summer sky, the better the weather is likely to be.

If the sky is cloudless with barometer high and steady and wind from the west, then good weather should be ahead. If the typical summer cumulus clouds form low to the ground and get even lower, then rain will probably occur during the day.

The summer cloud puffs are formed as air rises and contracts, thereby increasing the percentage of moisture in the air. When it increases enough, the moisture changes into tiny particles, which change the air to visible air — a cloud. If this occurs low to the surface of the earth, it is an indication that the moisture content of the air is great — thus a greater chance of rain from the clouds during the day.

After all, it would be rather tough to have to live forever.

Friendly criticism may be extremely helpful though it is not pleasant to the ear.

Worthwhile Womans Club Has Meeting

The general meeting of the Worthwhile Woman's Club was held Thursday evening at the Methodist Church. Mrs. Lee Reynolds presided during the business meeting. Plans for the new yearbooks were given.

Mr. Guy Angell presented the program on Expanding and Developing Educational Opportunities in Watauga County. Mr. Angell stated that the bond issue is an investment in the future citizens of this county and that if it passes on September 17 equal opportunities can be given to all high school students. Vocational courses would train students and adults for jobs. Advanced courses would be given to those wanting to enter college.

If the bond issue does not pass, some other means of caring for the increased enrollment of our high schools must be found. Due to long term retirement of the bonds, this is the cheapest method of providing the needed facilities, Mr. Angell said.

During the discussion period following Mr. Angell's talk, the club members planned ways in which they could help get the people to vote for the bond issue.
