

### Mayor Not Satisfied With Week-end Tour

#### Says Some Not cooperating In Putting Out Trash

Mayor Leroy Haskett informed The Herald that as the result of a tour of the entire town Sunday he found quite a few instances of trash and garbage in front of homes which was placed after the trash truck passed. The Mayor stated that he sensed a lack of cooperation on the part of a few in helping to keep a clean and neat town, and hoped everyone in Edenton will do their best to cooperate with an overworked Street Department.

Mayor Haskett was somewhat encouraged this week upon receipt of a letter from the Junior Woman's Club of Washington, N. C., requesting information as to the way Edenton handles its collection of garbage and trash. Some of the members have been impressed recently with the appearance of Edenton streets, which was the reason for writing the letter. The Mayor replied, giving the method followed in Edenton.

### Sugar Stamp No. 53 Will Expire March 31

Housewives are reminded by OPA that Spare Stamp 53, currently good for five pounds of sugar, must be "spent" in the next few days or not at all, since it expires March 31, one month earlier than originally intended.

The following day, April 1, OPA begins the use of ten-pound stamps, with Spare Stamp 11 becoming good for that amount, A. D. Simpson, Jr., Regional Sugar Executive, said in Atlanta.

"While Spare Stamp 11 will be good for ten pounds right on through September 30, we are hoping the sugar supply will make it possible to declare another ten-pound stamp good on July 1," Simpson said.

He emphasized, however, that these ten-pound stamps are not a "bonus" and that sugar must still be used carefully. He also pointed out that there will be no special stamps set aside this year for canning sugar, as the ten-pound stamps should prove sufficient to cover all necessary home uses of sugar, including canning.

# Any price is too high if it can be reduced

International Harvester announces \$20,000,000 price reductions

We believe there is nothing more important to this country than to lower the prices of the goods that people buy.

The American people have insisted that the government withdraw from its attempts to control prices in peacetime. That places the responsibility where it belongs—in the hands of business and industry. Not all business can reduce prices now. Not all can reduce by the same amount.

Our company has felt a duty to act as promptly as possible. In our case, the business outlook now makes it possible to move toward the goal of lower prices. The only way out of the vicious circle of higher and higher prices is to break through.

We have taken this step not because of present competitive conditions nor because of a drop in demand from customers. We have taken it because of our belief that ANY PRICE IS TOO HIGH IF IT CAN BE REDUCED.

These reductions, which will save the users of our products approximately \$20,000,000 a year, will become effective before April 1, and will apply to a selected list of tractor, farm machine, motor truck, and industrial power products. Since we lose money on a few of our products, and barely break even on some others, these reductions will not apply to our entire line. Reductions will be made individually on products. Some will be cut more than others. Exact details will be announced as soon as possible.

Our ability to maintain this lower level of prices will depend in part on what happens to the prices and flow of materials that we buy from others. Because we believe price reduction is vital, we are willing to assume the risks that are involved.

prices had not gone up as much or as fast as many others
Here are Average Price Increases since 1941
All Manufactured Products (U. S. Government Reports) . . . . . 63.7%
Motors and Metal Products (U. S. Government Reports) . . . . . 41.2%
Motor Trucks ( . . . . . 35%
Industrial Power Products . . . . . 34%
Farm Machines . . . . . 25%

These benefits to customers will depend, too, on uninterrupted production at reasonable wage levels. This is not a program that can be carried out if it is hampered by strikes or work stoppages.

Our employes have had substantial increases in pay, and wage questions are currently being discussed with many of the unions with which we deal. Stockholders have recently had an increase in dividend rate. Having considered the interests of these two groups, we are now making these price reductions for the benefit of the third group—our customers.

Business, to our way of thinking, has a social as well as an economic responsibility. This company has long followed the policy of operating in the interests of three groups—its customers, its employes and its stockholders. The duty of the management is to see that equal justice is done as between the three groups.

This price reduction program is another demonstration of our policy in action.
