

New York Harlem Hoboes Will Play In Edenton Friday Night

"Jo Jo The Hobo" heads the basketball fun show as the famous New York Harlem Hoboes take on the fast traveling St. Louis (show me) stars in another of their current barnstorming games. The Hoboes and the Stars are slated to play at Edenton Colored High School Friday night, November 13. Game time is 8:15 o'clock. Jo Jo, who hails from New York City, his real name is Milton Shay. He joined the traveling cage buffons three seasons ago, since that time he has thrilled and "fractured" fans throughout the states. Jo Jo plays the guard position and is one of the team's chief scorers.

The St. Louis Stars are billed as "Whiz Kids of the Midwest" and they are just what the name implies—a dashing bunch of basketball demons. The Stars captured several tournaments in the midwest and Canada before joining the New Yorkers for this season's tour. A pair of college All Americans have joined the Hoboes and are expected to make an outstanding name in the pro circuit. The new players are Joe Howell, fancy ball-handling forward and captain of North Carolina A&T College championship team of last season and Charlie Harrison, 6-ft., 6-in. center also from A&T. Harrison led the nation's small colleges in rebounds last season.

Fans can expect a fast-moving game and comedy show when the Hoboes and stars take to the local court.

The game is sponsored by the Edenton Sportsmen's Club.

DOWN WE GO—With this blimp-shaped vessel, "Trieste," scientists hope to probe deeper yet into the ocean's canyons. Designed by French deep sea experts Auguste and Son Jacques Piccard, the device is being lifted onto a freighter at San Diego, Calif., for a voyage to the 35,000-foot Marianas Trench in the Pacific.

Every boy taking a crop project such as corn, soybeans or peanuts is asked to take a soil sample for his project. Now is the time to do this. Often, if you wait until a few weeks before planting season, there is a delay in getting the results of your sample. The laboratories are crowded with samples at that time. If you send your soil sample in now, you will hear from it in plenty of time to order the right analysis and amount of fertilizer you will need. Also, where lime is needed, it should be applied several months ahead of planting. Limestone is slow acting and for it to have the desired effect on your crop, it must be applied well ahead of the planting date. So come by our office in the Post Office building and pick up soil sample boxes and cartons, information sheets, and other information and take your soil sample right away. You'll be glad you did.

I was very pleased with the way the new officers presided at the 4-H Club meetings this month. Some were a little nervous but I'll bet they will do even better next month. It's a real pleasure for me to see you develop this confidence and ability to speak before a group.

Two reminders:
1.—Turn in project record books right away. They are already past due.
2.—4-H Achievement Day, Saturday, November 21.

Changes Made In Soybean Supports

Premiums and Discounts Allowed For Foreign Material

For the first time in 1959 there will be monetary premiums and discounts for foreign material in soybeans placed under support in this state. According to H. D. Godfrey, ASC State Administrative Officer, the quantity of soybeans placed under ASC's price support program in the past was reduced by the amount of foreign material in excess of 2 percent. In addition, he said, in the past no premium has been added for soybeans containing 1 percent or less of foreign material.

This year, soybeans containing 1 percent or less of foreign material at the time of delivery to the Commodity Credit Corporation will get a premium of 2 cents per bushel. Soybeans with foreign material of more than 2 percent will get discounts ranging from 1 to 6 cents per bushel.

As in the past, soybean price support will be carried out through farm and warehouse-stored loans and through purchase agreements. Support is available from harvest through January 31, and loans will mature next May 31.

"The basic support rate for soybeans of the current crop in all North Carolina counties will be \$1.80 per bushel for Grade No. 2," Godfrey said.

Peanut Allotment Reduced For 1960

1960 Allotment 168,966 Acres as Against 169,118 This Year

North Carolina's share of the national peanut allotment has been reduced by 152 acres for 1960. According to Zeno O. Ratcliff, Jr., chairman of the Agricultural Stabilization and Conservation State Committee, the 1960 peanut allotment amounts to 168,966 acres as compared

with this year's allotment of 169,118 acres. This represents North Carolina's share of the total national allotment for 1960 of 1,607,988 acres.

There are peanut allotments in 47 of the 100 North Carolina counties. In these counties peanut farmers will be permitted to vote December 15 to decide whether or not marketing quotas on peanuts will be in effect for 1960. According to Ratcliff, farmers voting in this referendum will also determine the level of price support which will prevail on peanuts in 1960. The level of support will be reduced considerably if the referendum does not carry. Also, if the referendum does not carry, farmers who overplant their peanut allotment will not be assessed a penalty. However, acreage allotments will remain in effect regardless of the outcome of the referendum, and each farm will be allotted the same number of acres regardless of the outcome of the referendum. Compliance with the allotment established in 1960 will also be required in order for a farmer to be eligible for price support even at the reduced level, Ratcliff said.

PLEGED TO FRATERNITY
Eighty Atlantic Christian College men students have been pledged for membership by the four national social fraternities on the campus.

Included in the group is Johnny Kramer of Edenton, who was pledged to the Alpha Sigma Phi fraternity.

The first Christmas Seals used in the U. S. A. to fight TB were issued in Wilmington, Delaware, in 1907.

A man to be truly free must accept responsibilities. To be relieved of responsibility means to lose freedom and liberty.
—C. T. A. Sparks.

SUNDAY SCHOOL LESSON

Contin'd. from Page 3—Section 2

neither are they worth defending. There is a close relation between stubbornness and the holding of convictions that are worthless and unimportant. Most

wars have been fought over stubborn convictions held in hatred and the desire for revenge. How may we know whether or not our convictions are foolish or noble, selfish and prideful, or Christ-like and helpful? There is one simple test indicated in this story of Stephen's martyrdom. "Full of the Holy Spirit," he looked "into heaven and saw the glory of God and Jesus standing at the right hand of God!" (Acts 7:55). The meaning of these words is significant. Stephen was seeking not his own glory, but the glory of God. At the basis of his convictions was the spirit of Jesus, "the Holy Spirit," by which he tested everything.

We have heard it said, "He has the strength of his convictions." Well, this is next in importance to being sure that our convictions stand the test of love. How strong are they? Again the answer comes from this beautiful account of the way Stephen stood for what he believed. "And as they were stoning Stephen, he prayed, 'Lord Jesus, receive my spirit'" (Acts 7:59).

Here we find the reason for his strength. Like us, he was frail and afraid of himself. Like him, we do not have the power to stand within ourselves alone. It is given to us. The purely self-centered, self-dependent person cannot withstand in the evil day. It is "not by might, nor by power, but by my spirit," says the Lord of hosts" (Zachariah

Suffering for one's convictions deepens and extends one's influence. For example, Stephen's martyrdom has a profound influence in the conversion of Paul. If one looks at a cause in the light of the scars, he may give up the cause. But if one looks at the scars in the light of the cause, the cause may be glorified.

Christ calls on us to live in the light of the best that we know. We ought also to be diligent in seeking for greater truth. In all things we should seek humbly to manifest the

mind and the spirit of Christ. The courage to stand comes to those who, like Stephen, learn how to pray, to see clearly through the dark clouds of hate and selfishness into the heaven where Jesus and his spirit are truly "at the right hand of God."

Surely, if we are "faithful unto death," we will receive from him the "crown of life".

SENATOR SAM ERVIN SAYS

Washington — That the United States is lagging in the space race is no longer debatable.

Space Lag Tragedy
The tragedy of the space lag is that persons in places of great responsibility have repeatedly discounted the significance of our unfortunate position. A frank recognition of the situation should be a first step in rallying the people behind the sacrifices that will undoubtedly have to be made.

The United States has been under unnecessary psychological disadvantage since the Soviets put their first satellite in orbit, Sputnik I, two years ago. Lunik III has accentuated this psychological disadvantage and the fact that our country now has an uphill pull in this vital area of scientific achievement. A widening space gap between the United States and Russia can no longer be tolerated without jeopardizing our very existence.

Confusion In Program
Frankness compels me to make the observation that confusion and lack of centralized authority in the space program have been largely responsible for our unhappy position.

After the Russians launched Sputnik I, General John Medaris testified before the Senate Armed Services Committee, of which I am a member, that the Redstone Arsenal team could have put a United States satellite in orbit at least 14 months before the Russians, had the wraps been taken off the program. What a needless loss of psychological and scientific advantage was caused by confusion!

Effective Plan Needed
Congress has been unable to get a clear-cut proposal from the Pentagon, and the accomplishments of the Soviets in the space program have been minimized by the White House.

I believe Congress will continue to stand ready to provide whatever funds are necessary to make effective progress in the space program. It will necessarily be more than wishing to make effective progress come about. Now that the public is again aroused over our lagging space program, perhaps the White House and Pentagon will sense the people's concern.

Action will be the urgent order of business when the Congress convenes.

CHOWAN NEWS

By HARRY VENTERS
Assistant County Agent

The Center Hill Junior 4-H Club will meet Monday afternoon, November 16, at 4 o'clock at the Community Building.

The Center Hill Senior 4-H Club will also meet Monday, but at 7:30 P. M. I hope that all of these club members will try to attend and bring their completed record books with them if they haven't already turned them in to Miss Aman or me.

The school 4-H Clubs met this week. The demonstration topics were "Buying and Care of Sweaters and Skirts" for the girls and "Soil Sampling Procedures" for the boys. Both of these demonstrations are timely.

Soil sampling is very important for all farming enterprises.
