

A Waiting Father

By TERRY JONES

"For this my son was dead, and is alive again; he was lost, and is found." —Luke 15:24.

Jesus was teaching a group of sinners and publicans one day and He told this story:

A man had two sons. One day the youngest son came to his father and said, "Father, give me the portion of goods that falleth to me." This father must have loved his son a great deal for he fulfilled his son's wish and gave him his inheritance.

Soon the young man left his father's care and went into a far country and began to live a life of carefree worldliness. The young son quickly spent his inheritance on foolish things of the world. About this time a great famine came over the land. Jobs and money were scarce and the young man became desperate for money. The only job he could find was feeding swine. He was in such desperate need he took it and soon began to eat the husks that the hogs ate. This surely wasn't the life he had planned with his inheritance.

One day the young man came to his senses. He realized that even his father's servants had food to spare and here he was starving to death with swine. So he decided to go home and admit his sin and plead with his father to let him be one of his servants that he might have something to eat.

The father happened to see his son coming home a long way up the road. And the over-joyed father ran down the road and met his son and hugged and kissed him. He received his lost son home again willing to forgive all that he had done.

Jesus' purpose in telling this story was to let the world know that even if we have drifted away and not kept our Christian obligation as we should we can still come home. If you are reading this and you realize that the life you have been living is not pleasing in the sight of God then you, too, have a loving father waiting for your return with outstretched arms. Won't you return home to the cross today?

Dinner Planned For Ton And Half Club
Continued from Page 1, Section 1

late. Digging at the correct time not only increases yield but also the graded quality and the final price received for the crop.

"The Chowan County testimonial dinner for 1962 members of the Chamber-sponsored Ton and One Half Club will take place in December," Chesson said. "Appropriate certificates of membership will be awarded those qualifying. I hope we have to place a larger order with the printer this year than ever before."

SOIL CONSERVATION NEWS

By G. SAMUEL COX, Work Unit Conservationist

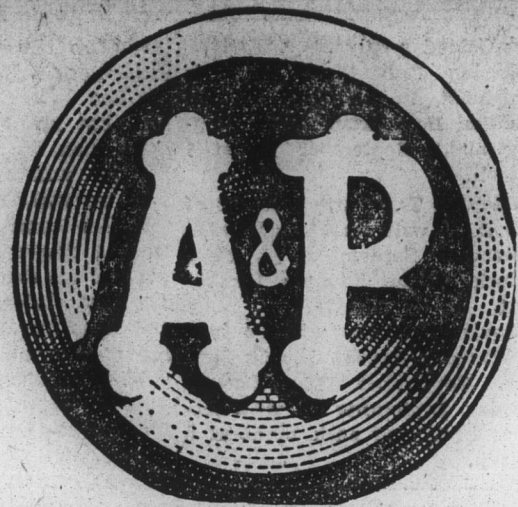

Conservation Farming
Forrest E. Lane and W. L. Peele are in the process of developing new conservation plans for their farms with assistance from the Albemarle Soil Conservation District. L. R. Boyce and N. D. Chappell are revising their present plans and bringing them up to date to meet their present farming conditions. These farmers are planning conservation cropping systems or crop rotations to meet the capability or the needs of the land to maintain and improve it. In other words, these farmers are planning to plant the crops that they have on the best land that they have that is suited for these crops in an organized system. They are also planning the crop residue management and cover crops needed. The needed drainage and other aspects of the farming operation are planned. The Albemarle Soil Conservation District will assist them in carrying out these plans.

Pollock Swamp Watershed
A meeting was held last Thursday regarding progress being made on the Pollock Swamp Watershed Project. Attending this meeting were W. S. Privott, Attorney for the project, George Sherman, SCS State Engineer, L. D. Hunnings, Area Engineer, Carlyle Webb, local Civil Engineer for the drainage district and Guy R. Ledbetter, Soil Conservationist.

Discussions at this meeting seemed to indicate that the maps and plans for the project would be completed this week and filed with the clerk of the court. Following a required 15 day waiting period, the final hearing would be held around October 1. The landowners must then raise their portion of the project cost, most of which will probably be obtained through an FHA loan. The project agreement would then be signed and bids issued. This would probably take place the middle or last of October.

Annual Fish Fry
The annual Albemarle District fish fry was held on August 25 in Elizabeth City. Approximately 300 district supporters enjoyed fish, cole slaw, hushpuppies, and good fellowship.

The proceeds will be used to help run your district program in the five counties, and will go for paper, stationery, postage and district sponsored contests.

Quietest, smoothest, slickest running shaker ever built—Lilliston's 1100 series Digger-Shaker-Windrower

Another Lilliston breakthrough—the direct result of continuous research and testing to give you the finest possible windrowing performance at the lowest possible price. A few reasons why the 1100 is far and away your best buy:

- the 1100 is wide enough to fit the new 4-row plantings as well as the conventional 2-row crops. Not only does it work well on narrow rows, but it is also particularly effective in both heavy and light vine growth.
- the bars on the rattle chain are closely spaced, a feature especially valuable in light vine conditions where clumps of nuts may sometimes be lost between the bars of more widely spaced rattlers.
- you can raise or lower the rattler assembly on the 1100 to adjust it to ground level and coordinate it with the digger blades without changing the belt tension.
- the 1100 is tough—built to do the job day after day without breakdowns. It will give you the right start to a productive harvest—and keep doing it year after year.
