District Health Department In Favor Of Dog Pound In Edenton As Proposed By Dr. L. A. Deese

According to letters sent to town officials, the District Health Department has gone on record as being highly in favor of a proposal made by Dr. L. A. Deese to construct a dog pound for the Town of Edenton.

The letter signed by K. J. Eyer, sanitarian supervisor and Dr. Isa C. Grant, district health director, points out that the control of the stray or unwanted dog plays an important part in a successful public health program. If such dogs are permitted to run at large they are not only dangerous to human beings

(especially children) but also to other domestic animals and wildlife. They can create a nuisance about town, also present a very unsightly picture to the tourist.

"In the past little has been accomplished regarding stray dogs," the letter says. "The construction of a dog pound and picking up unwanted dogs could lead to an effective program. This department recommends that Town Council take the necessary action to make this program a reality. If this department can be of any service, please feel free to call on us."
