

Engagement Announced

MISS MARGARET LOUISE EURE

Mr. and Mrs. Fenton Towe Eure of Route 3, Hertford, announce the engagement and approaching marriage of their daughter, Miss Margaret Louise Eure, to Ronald Dale Chappell, son of Mr. and Mrs. Arnold Chappell of Route 2, Tyner. The wedding will take place on Sunday, June 28 at 3 P. M. at the Berea Church of Christ. No local invitations are being sent but friends and relatives are invited to attend.

Get Ready for Boll Weevil Control: With the arrival of hot weather for the last week cotton is really starting to grow. The 8-leaf stage of growth is beginning to be reached in several fields and within the next week or ten days will be attained in most cotton fields.

The first series of four applications of insecticide to control boll weevils should be applied when approximately 50% of the cotton plants have reached the 8-leaf stage of growth. One application should be made each 5 to 7 days until three or four applications have been made. The second series of applications should begin around July 20-25. Applications should be made every 5 to 7 days then for at least three or four applications and then we will determine whether further applications should be made.

I checked with the Entomology Department last week and they say that the population of boll weevils surviving the winter is somewhat higher than a year ago at this time. This means we can expect more boll weevils this year and control measures will be more necessary in order to produce a good cotton crop.

There are a number of herbicides and combinations recommended for boll weevil and general insect control. In order to overcome weevil resistance, I think it will be well to vary the herbicides used. For example, one herbicide might be used for the first application and another for the second application, etc. Trithion is the best insecticide I

have found yet to control the red spider or spider mites. Trithion may be used in combination with a boll weevil insecticide if spraying is done. In the case of dusting, I would make one good application of trithion alone as soon as red spiders are found in the field. The main thing is to watch fields carefully for the appearance of red spiders, and I have already observed an infestation starting in one field.

Peanut Herbicide Performance: While we have been disappointed in the performance of herbicides to control grass and weeds in some fields I am confident that it has helped greatly in every field it has been used on. Due to the dry and cool weather herbicide performance was handicapped and earlier shallow cultivation has been necessary. I don't believe the herbicide expense has been wasted because there is a good indication generally that there is much less grass and weeds among the peanuts where herbicides have been used.

Peanut Information Notes: Extension Peanut Specialist Astor Perry says that herbicide useage is up 15-20% over last year and the new herbicides Vernam and Diphenamid largely account for this. Herbicides have been more effective in 1964 than in 1963. Alanap-Dinitro combination has caused little, if any, stunting in 1964. Vernam is causing stunting in many fields and is quite severe in some limited locations. No stunting has been observed yet with Diphenamid (Dimid or Enide) and Dini-

tro combination. In general peanut stands are much better than in 1963. All-practice peanut demonstrations are showing excellent results so far. The attitude of growers towards using improved practices has greatly improved.

The first 30 to 50 flowers and pegs per plant end up as the mature pods at harvest time. We believe that an earlier application of land plaster should be made, perhaps within the next week or two apply 300-400 pounds and then apply the other 300 or 400 pounds per acre when peanuts begin to bloom in July.

Southern Stem Rot Control in Peanuts: Extension Pathologist J. C. Wells says that Southern Stem Rot is a very common disease of peanuts and occurs to some extent every year on many farms and at times causes severe losses. The covering of portions of the peanut plant with soil by cultivation makes an ideal situation for Southern Stem Rot to work. Flat and shallow cultivation throughout the season is very important in combatting this disease.

In fields that are known to be infected with Southern Stem Rot, especially where the corn stalks or other litter was not turned under deep and left there, it may be advisable to apply an application of Terraclor. This should be applied within the next two to three weeks, at the rate of 12 to 15 pounds actual per acre in a 12" band.

Eastern District 4-H Demonstration Day Success: I have heard quite a number of comments on the 4-H Demonstration Day held at Chowan High School last Wednesday. All of these have been very complimentary. The school officials gave us excellent cooperation. Adult 4-H leaders and other leaders did an excellent job in performing the duties that they were assigned to and everything seemed to work very smoothly.

I know that the 4-H Club members in Chowan County and those of all the other 16 counties of the Eastern District appreciate very greatly and would like for me to tell all of you who played any part in making this event a great success "thank you very much."

Mildew on Flowers and Shrubs: In my recent travels over the county I have observed powdery mildew affecting flowers and shrubs in several places. Mildew appears as a white powdery looking substance on the leaves causing the leaves to turn yellow, then dark, and then they will shed from the plant. If this fungus disease is not controlled it can damage the plant severely and may even kill it.

Sulphur is one of the best fungicides I know of for controlling powdery mildew. The regular copper-sulphur dust that we use on peanuts is very good, just dust the plants thoroughly with

it. For those who wish to spray, use wettable sulphur at the rate of a good tablespoonful per gallon of soapy water and spray the leaves thoroughly underneath as well as on the top.

Edenton Police Make 55 Arrests In May

Chief of Police James Griffin reports that during May Edenton police made 55 arrests of whom 48 were found guilty as charged and six cases pending in court. Drunks and speeders led the arrests with 14 each.

Fines amounted to \$172 and costs \$439.40 for a total of \$611.40. Of this amount \$200 was turned back to the town in way of officers' fees.

During the month police answered 48 calls, investigated four accidents, worked five funerals, extended 34 courtesies, found 27 doors unlocked, answered two fire calls, reported 37 lights out, made 80 house checks, and issued \$615 traffic citations. The police made 398 radio calls and were on the air 34 minutes.

Frances Williford Weds Ronald Lewis

Miss Mary Frances Williford, formerly of Merry Hill, now of Greensboro, and Ronald George Lewis of Galax, Va., were married Saturday, June 6 at Galax in the Methodist parsonage by the Rev. H. G. Cioley in a private ceremony. Her only attendant was Miss Sandra Williford, her cousin, of Greensboro. Miss Williford is the daughter of Mr. and Mrs. Wright Williford of Merry Hill. Mr. Lewis is the son of Mrs. Callie Lewis and the late George W. Lewis of Galax.

After a wedding trip to Claytor Lake, they are at home at 910 Lexington Avenue, Greensboro, where the bridegroom holds a position as assistant manager of American Finance Company.

The bride has been working at Greensboro for a year. She is a graduate of Windsor High School.

Bread of deceit is sweet to a man, but afterwards his mouth shall be filled with gravel. —Proverbs 20:17.

NOTICE OF SALE Under and by virtue of power of sale contained in a certain Deed of Trust executed by Linwood Privott and wife, Delcie Privott to R. C. Holland, dated February 13, 1960 and recorded in Book 75, pages 659-660, in the office of the Register of Deeds of Chowan County; and under and by virtue of the authority vested in the undersigned and substituted Trustee by an instrument of writing dated the 20th day of September, 1962 and recorded in Book 17, page 214 et seq in the office of the Register of Deeds of Chowan County, default having been made in the payment of the indebtedness thereby secured and the said Deed of Trust being by the terms thereof subject to foreclosure, and the holder of the indebtedness thereby secured having demanded a foreclosure thereof for the purpose of satisfying said indebtedness, the undersigned substitute trustee will offer for sale at public auction, to the highest bidder, for cash, at the Courthouse door of Chowan County in Edenton, North Carolina, at 11 o'clock A. M., on Wednesday the 1st day of July, 1964, the land conveyed in said Deed of Trust, the same lying and being in Edenton Township, Chowan County, North Carolina, and more particularly described as follows: The lots with all buildings and improvements thereon designated and numbered as ninety-eight (98) and ninety-nine (99) of that certain sub-division known as "Eden Heights" as will appear on that certain plat made by W. J. Berryman, Surveyor, which plat is duly of record in Deed Book P, page 566, in the Public Registry of Chowan County, North Carolina, and being the same property conveyed to the said Linwood Privott by The Albemarle Peanut Company, Inc., by deed dated May 28, 1952 and recorded in the aforementioned office in Book of Deeds No. 10, page 228, said plat and deed and those instruments mentioned therein being hereby referred to and made part hereof for further description and chain of title. Taxes due Chowan County for the year 1964 will be assumed by the purchaser. Ten (10%) percent of the first \$1,000.00 and five (5%) percent of the excess will be required of the successful bidder at time of sale. Dated this 25th day of May, 1964. W. J. BERRYMAN, Substituted Trustee. Jun4,11,18,25

"DOCTOR KNOWS BEST..."

As American as pumpkin pie is the phrase, "Doctor knows best." We all remember this truism from childhood. Yet, in this enlightened day, some people, relatively few in number, attempt to diagnose and treat their own illnesses—a dangerous practice to say the least. Only your physician is qualified to diagnose and prescribe. When medication is required, our prescription department is equipped to serve your needs.
