Cotton Referendum
Chowan County will conduct a cotton referendum by mail between May 16-25. The issue involved in this referendum is to determine whether or not Chowan County cotton growers wish to transfer allotments across county lines. The county growers turned down this issue in the referendum last

White Reports On Bond Sales

U. S. Savings Bonds sales in North Carolina during March showed an increase of over 7 per cent above sales of March a year ago. Total E and H Bond sales for the month amounted to \$4,299,842. Combined sales of E and H Bonds for the first quarter of the year amounted to \$13,741,122, which is over 2 per cent ahead of first quarter sales of 1965. This amounts to 26 per cent of the State's annual quota of \$52,900,000.

Bond sales in Chowan County, according to Graham White, Chowan County Volunteer Chairman, were \$9,273.00 in March. For the first quarter they amounted to \$24,260.00, which is 32.6 per cent of the County's quota for this year.

"We are pleased with the current trend of Bond sales in North Carolina," said W. H. Andrews, Jr., volunteer state chairman, "and we expect to have another outstanding sales record in our State this year. With the new interest rate of 4.15 per cent which is now paid on all Savings Bonds, new and old, Savings Bonds are a better buy than ever before."

Churchwomen Plan Meeting

Rev. Howard Cutler of Kinston will speak to St. Paul's Churchwomen Tuesday, May 10, at their regular luncheon meeting in the Parish House at 1 P. M. His subject will be the "Discipline Youth Program".

There will be a Board meeting at 12 noon prior to the luncheon. Rev. George Holmes will install the churchwomen officers for the coming year at the close of the regular meeting.

fall. Ballots will be mailed to all known eligible voters by May 13.

Price Support On Untied Tobacco

USDA has announced price support will be made available on untied flue-cured tobacco of all grades during first 12 sales days this year on all markets in South Carolina, North Carolina and Virginia.

Price supports on 1966 crop tied tobacco will continue at 3 cents per pound higher than for untied tobacco for each grade. The differential was reduced from 6 cents per pound to 3 cents per pound last year to reflect narrowing market price differential between tied and untied tobacco in recent years. The difference between market prices of tied and untied tobacco averaged from 2 to 4 cents per pound for most grades in 1965.

Crotalaria—Friend Turned Foe

Several grain marketing firms have reported an increase in crotalaria contaminated grain showing up at their elevators this year compared to the last few years. As you know, crotalaria seed have been found to be poisonous to livestock and poultry even when consumed in small quantities. When ingested in large amounts, death to the animal usually results.

A few farmers are still using crotalaria as a cover crop in some areas. However, this is not a desirable practice since the seeds may remain in the soil for many years after the mature plant is destroyed. The land may eventually be planted to a crop such as corn or soybeans and the volunteer crotalaria plants have to be removed to avoid contamination of the harvested grain. Growers should use another crop such as soybeans, cowpeas, vetch, lupine velvet beans or rye as their cover crop.

Wool

Producers selling shorn wool or unshorn lambs should apply for the incentive payment under the wool program at the ASCS office. Applications should be filed after all the sales for 1966 on shorn wool or unshorn lambs are made. Please bring bills of sale with you. The wool price support rate for 1966 has been set at 65 cents per pound.
