Diverted Acreage Requirements

We wish to remind feed grain and cotton participants that, in order for land to be eligible for diverted acreage, it must be cropland:

1. That has been planted in a row crop in at least one of the past four years, or

2. Accepted and approved as diverted acreage under a diversion program in such years,

3. Be equal in productivity to other land on the farm. Low, wet areas, new land with roots and stumps will not be eligible.

5. Diverted acreage must be idle with no livestock on the land from April 1 through October 1, 1967.

6. Designated acres of less than one-half acre are not acceptable diverted acreage.

7. Set aside sufficient acreage to fully satisfy your intentions as stated on cotton and/or feed grain contract. Failure to do so can cause stiff penalties or in some cases no payment at all.

Cotton Program

The final date for planting cotton has been revised to May 15. In order to earn any payments in the 1967 cotton program all participants must plant cotton in a workmanlike manner by May 15. If cotton failure results before May 15, then the cotton must be replanted by this date.

Reappointed Cotton Acreage
Cotton producers that wish to get additional acreage to plant in 1967 should file a written request with the ASCS office by Friday, April 14.
