

PREWAY

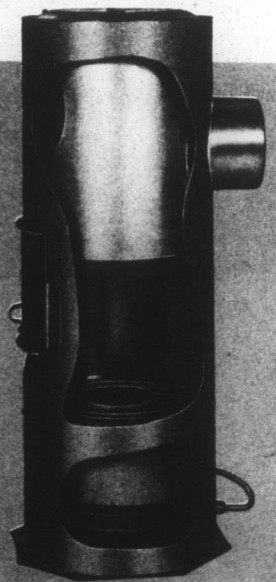

smartest way yet for heating inner space with oil

a
beautiful
way to heat

You can buy this, or any Preway heater on looks alone. Styled as a modern stereo or TV console, it is neutral in color and has the luxurious appearance of fine furniture cabinetry. It belongs in a room — any room, and anywhere you wish to place it.

**PREWAY'S EXCLUSIVE
HEAT ECONOMIZER**

The Preway Heat Economizer is different from others in that it is designed to be an integral part of the Combustion Chamber — not an add on afterthought. But the pleasant news about it to the owner is that it cleans itself. You never have the dirty job of trying to remove soot or carbon deposits. It's really the carefree way to heat.

WIND FRONT CONTROLS

At the Preway heater, the controls have been designed to be reached when you are most conveniently seated. They are also designed to be reached — just as easily — as you turn the heater on and off.

Patented Electric Ignition

Only Preway can bring you this fully automatic deluxe feature. An electric element ignites the oil when heat is called for. No pilot light, no wasted oil at any time.

Preway's Air-Activated Burner, on all models, is designed so that the correct mixture of air and vaporized oil is always sustained to maintain full and complete combustion.
