The groom is the son of the Rev. and Mrs. Arnold of Enfield. He attended Guilford College and the N. C. School of the Arts. He is manager of the Little-Lake Gaston branch of the Enfield Savings and Loan Association.

The bride was given in marriage by her father.

Mrs. Bruce Melvin Copeland of Wake Forest, sister of the bride, was matron of honor. Other attendants were: Miss Jennifer Cady Crandall of New York City, sister of the bride; Mrs. Charles Douglas Goodyear of Greensboro and Miss Cynthia Kay Tew of Pinehurst.

Mr. Robert Marks Arnold of Raleigh, brother of the groom, was best man. Ushers were Mr. John Felix Arnold, Jr., of Durham, brother of the groom; Mr. Jack McMullan Pruden, Jr., of Durham and Mr. Kim Crump Venters of Greensboro.

Mistress of ceremony was Mrs. Raymond Wilson Storie.

The bride wore a formal gown of candlelight taffeta and reembroidered Alencon lace. The fitted bodice featured all over Alencon with an open Queen Anne neckline. Long fitted sleeves of taffeta with lace appliques came to the wrist with a pointed miniature scalloped edge. A full taffeta skirt fell softly from the bodice to form a chapel length train.

A deep border of Alencon lace at the hem finished the design of the dress. For the headpiece, the bride chose a mantilla mounted on an empress caplet. The veil featured reembroidered Alencon lace appliques over illusion flowing to the back of the chapel length train.

The reception was held at The Queen's Quest, Inc., 112 West Water Street.

After a wedding trip to the Outer Banks, the couple will reside at Lake Gaston.

WHY A BRIDGE?
Is it really necessary to replace adult's missing teeth with a fixed bridge or partial denture? The answer is a definite YES! The reasons are quite simple.
When a tooth is lost, the adjacent teeth and the tooth above or below which acts as a biting partner, lose the support, strength and stabilizing influence which the lost tooth once provided. The remaining teeth will be subject to many problems such as drifting, abnormally exposed decay-prone areas and, worst of all, periodontal disease. (The single largest cause of tooth loss in adults).
The loss of just one tooth, if not replaced by a fixed bridge or partial denture will more than likely ultimately cause the loss of more and more teeth. In many patients, it is only a matter of time until the destruction is complete.
The dental arch was designed by nature to have a complete set of teeth: one helping and protecting the other. Replacing missing teeth with a dental appliance will maintain this design as well as your smile and ability to eat properly.
