### Peanut Market Trade Slow

**Southeastern Section** — Trading was slow with very few sales reported on new crop peanuts. Harvest was progressing slowly. The crop reporting board service estimated that 8 per cent of the crop was dug in Georgia as of September 8. New crop runners shelled U. S. splits 55; old crop runners shelled jumbo 64.

**Virginia - North Carolina** — Trading was slow with few sales reported. Conditions remain good for the crop. Producers were still optimistic. Harvesting was still expected to get underway by the week of September 21. Old crop Virginias unshelled fancy September-October 54, shelled No. 1 50; No. 2, 50; new crop unshelled fancy September-October 50.

**Southwestern Section** — Trading was slow with a few sales reported on spot loads. Harvest was again delayed in South Texas due to rain. The yields for South Texas are lower than had been anticipated. Some harvest has begun in Oklahoma. Sales as shown below were for a limited number and volume of sales on spot loads for mostly immediate or prompt shipments. Prices were cents per pound and represent few sales. Old crop runners' shelled medium 60; new crop runners shelled U.S. splits 60.

### Veeco Reveals Stock Earnings

Virginia Electric and Power Company has announced earnings of \$1.73 per share of common stock for the 12 months ending August 31, an increase of 4 cents of 2 per cent compared to the 12-month period ending August 31, 1980.

Net income for the 12 months ending August 31, was \$230,219,296 on operating revenues of \$2,117,533,329.

Earnings declined in August because of unusually moderate summer weather, resulting in fewer kilowatt-hour sales of electricity. Residential sales of electricity declined by 13.1 per cent, compared to August, 1980, while total sales of electricity declined 6.1 per cent, despite excellent performance of Veeco's generating units.

About 48 per cent of customers' electricity during August was provided using economical Nuclear generation. Another 30 per cent was generated with coal and 18 per cent by purchases of primarily coal-fired electricity. Only 3 per cent of customers' electricity during August was provided by burning oil.

Cooling degree days for August, 1981, were about 9 per cent below the 30-year average for the month of August, compared to August, 1980, when cooling degree days were 41 per cent above the 30-year average.

### Auman Joins Railway Staff

WASHINGTON, D.C. — After more than eight years as an aide to U. S. Rep. Ike Andrews (D-N.C.), Robert M. (Bob) Auman has resigned to join Southern Railway's public relations and advertising staff.

He will be based at Southern's headquarters in Washington and assigned to travel frequently to South Carolina and his native North Carolina on behalf of the railroad's "Operation Lifesaver" program of reducing accidents, injuries and fatalities at grade crossings.

Auman, 41, was born at Pinehurst, and reared on a nearby peach-and-tobacco farm. He is a son of former state Rep. and Mrs. T. Clyde Auman of West End.

Prior to joining Rep. Andrews' staff in 1973, Auman served as speechwriter for former Gov. Robert W. Scott.
