INSIGHT INTO EYESIGHT

DR. A.F. DOWNUM, JR. OPTOMETRIST

Myopia: Seeing Things Close Up

Myopia is what your eye specialist calls it when an examination shows you can see things better close up than far away. But myopia is not an advantage. It's a problem. Your eyes focus on an object too soon. If you're very nearsighted, you can't even hold a book at the normal distance for reading. You have to bring it closer to your eyes. And any distant object will be seen only as a blur.

Our eyes change as we grow older. A condition like nearsightedness may improve; or it may get worse. If your glasses or contact lenses are not giving you clear vision, you can probably benefit from a change in prescription. If you haven't had your eyes checked lately, now is a good time to make an appointment.
