

WOODLAND CONTEST — Forester Bruce Birchett assist team members with a typical field exercise.

# IF YOU'RE NOT SHOPPING AT WINN-DIXIE,

# AREN'T YOU TIRED OF PAYING TOO MUCH FOR YOUR GROCERIES?

## Week after week after week, we beat the store that claims to be "LOWEST" in head-to-head price comparisons.

### Camden Is Contest Winner

According to Albemarle District Chairman Lloyd Bunch, the 20th annual Future Farmers of America's woodland contest was held recently in Pasquotank County. Five different school teams were present to participate.

Contestants were asked to identify different tree species. They were asked to determine the volume in board feet of saw timber trees and to estimate volume in cords of pulp trees. Insect damage, disease, and controlled fires were also part of the study course. The purpose of the exercise is to promote a basic understanding of forestry management.

The contest was sponsored by Union Camp, Jones Lumber Company and the Albemarle Conservation District. Conducting the contest were representatives of the N. C. Forest Service with Forester Ray Finch in charge. "The timber companies, the Forest Service and the Vo-Ag teachers all working with the District makes this a worthwhile project," Bunch concluded.

The first place winners were from the Camden Chapter, second place went to Currituck and Northeastern placed third. Also participating were Holmes High School team of Edenton and the Gatesville High School team.

### Death Claims Mr. Jethro

Larry Lee Jethro, 43, of 505 E. Queen Street, Edenton, died at the Chowan Hospital on October 29 following a sudden illness. The son of Mrs. Addie Hudson Jethro of Edenton and the late Roman Jethro, he was a veteran of the army and self-employed in the plumbing business. He was a member of the First Christian Church in Edenton.

Besides his mother he is survived by his wife, Mrs. Estelle Jones Jethro of Edenton; one son, Barry Wendell Jethro of Greenville, N.C.; his daughter, Susan Lee Jethro; one

brother, Delaney G. Jethro of Edenton; his sisters, Mrs. Rosa Sharon Perrington of Salamanca, N.Y.; Mrs. Geraldine Wilder of Belvidere, N.C.; Mrs. Sonnie E. Hurdie of Hertford, N.C.; and Mrs. Sherry Ann Baker of Windsor, N.C.

The graveside funeral service was held at Beaver Hill Cemetery Saturday at 3 P.M. by Rev. Norm Gloeckler. The family met at the home of his mother, Mrs. Addie Jethro at Route 2, Edenton.

Pallbearers were Donald Bunch, Aubrey Twiddy, Denzel Anderson, Floyd Alexander, Bill Skittlethorpe, and Gibson Mithchell.

### Boats Sought For Display

Continued From Page 6-B

were not noted for frills, but varied purposes. They were used for transportation, fishing, crabbing, and a number of other functions. They were rowed, poled, and driven by motors.

The shad boats were used in the sounds for fishing large schools of migrating snags. They originally were driven by sails designed so they could be raised and lowered easily.

Anyone interested in donating or lending a wooden boat to the Center should call 473-3493 or write: North Carolina Marine Resources Center-Roanoke Island, P. O. Box 967, Manteo, N. C. 27954.

### Local Schools

Continued From Page 6-B

requests fall under the principals' area of responsibility, rather than the Board's.

The School Board met informally all day Saturday to start the process of making specific plans to deal with recommended curriculum needs, predicted facility needs and eventual costs.

### INSIGHT INTO EYESIGHT

DR. A.F. DOWNUM, JR.  
OPTOMETRIST

### HOW WE SEE

After centuries of wonder about how we are able to see, science has come up with the answers. It also has answers for people who need help in seeing clearly.

What happens when we see? It all depends on light (even a cat can't see when it's pitch black). Every object exposed to light emits light rays. These rays travel from the object to our eyes. They enter through the cornea, the transparent membrane in the center of the eye. The cornea bends the rays slightly inward on the way to the lens, which narrows them even more.

The normal eyes, the rays converge together in sharp focus when they reach the

retina. This is the "back wall" of the eye that transmits the image to the brain.

What kind of image the brain receives depends on how sharp the picture is. If it isn't in focus, it will be blurred. And that means the eyes need corrective glasses. Difficulty in focusing on objects at a distance or up close (like the newspaper) are common. These are some of the problems corrective glasses can solve.
