own weight and ultimately had no chance of being enacted. Those of us who introduced the present regulatory bill feel that this is a modification or compromise of the bill two years ago and has an excellent chance of being enacted.

Back in January I reported to you that I was concerned about the termination of certain Coast Guard activities, search and rescue, participating in the control of the importation of illegal drugs, imposing the 200-mile fishing limit and other things. I introduced a supplemental appropriation bill in order that these vital and essential services could be continued. Although no official action has been taken, I have been assured by the Chairman of the Subcommittee which must pass judgement on this legislation, that it will be approved carrying a figure of \$172 million. If this becomes a reality, then most of the present activities of the Coast Guard will be continued.
