**Garden Club Holds Meeting**

The Garden of Eden Club held its last meeting of the year at the home of Carol Siek on Tuesday morning, May 4. The following new officers for 1982 - 83 were installed: President - Judy Baker; President Elect - Laura Lee, Tichnor; Vice-President, Carol Siek; Secretary, Anne Ellis; Treasurer, Nellie Jones; Historian, Nancy Wood; Parliamentarian, Ruth Phillips.

Corinne Thorud performed the installation ceremony by constructing a flower arrangement, each part of which represented the qualities needed for each office. A constitutional amendment was passed requiring that a member must attend six meetings during the year, or be dropped from the membership and placed at the end of the membership waiting list. A discussion followed on the subject of continuation of the Fall plant sale. The President appointed a committee to investigate new methods of fund raising and report to the September meeting. The incoming president announced committee assignments for the following year. A standing ovation was given the outgoing president, Susan Creighton, and a gift presented to her. She responded by thanking all members for their cooperation and presenting each one with a plant.

**The Single-Vision Lens**

When most people get their first pair of eyeglasses or contact lenses, more often than not they're made with single-vision lenses. This doesn't mean they can see only in one direction. Nor at only one distance. The "single" stands for just one set of optical corrections in the lens.

The single-vision lens can be for reading or for seeing at a distance. It all depends on the problem that needs correcting.

Nearsighted people need help in seeing things at a distance. Farsighted people may need help seeing objects near-by. People who have an astigmatism need help in both directions. Their eyes have two focus instead of one. This gives them blurred vision no matter how close or far away an object may be. Corrective glasses or contact lenses clear things up so they can see as well as people with normal vision.

No matter what the vision problem, it can usually be solved with the right kind of glasses or contact lenses.

In the interest of better vision, from the office of:

**Don't Ignore "Pink" Toothbrush**

If your toothbrush turns pink after brushing, you have a dental problem - one that should not go unattended. You are experiencing bleeding gums, a likely indicator of gingivitis (or inflamed gums).

Gingivitis is the first stage of periodontal disease which accounts for the greatest tooth loss in adults. But if you catch it early, you can reverse it with the help of your dentist and a proper home brushing and flossing regimen.

There are other symptoms of gingivitis, such as soft or swollen gums. Rather than go into all the details, take this advice. Go straight to your dentist and let him examine your gums and evaluate your situation.

With a little looking and painless probing, and an x-ray check, he'll immediately know how far advanced it is and what can be done to save you a lot of future problems. If left untreated, it will only get worse. If you do nothing about improving your home care along with proper professional care, the disease may eventually destroy the tissue and bone supporting the affected teeth. This could likely result in the loosening and eventual loss of teeth which could have been kept healthy.
