Jim Criddle

Regular meeting night is August 3. We will eat at 7:00 P.M. with business meeting to follow at 8:00 P.M.

James W. Ball will be our special guest speaker. He will show slides of his tour in Viet Nam. Ball is a former Navy man who is now City Executive for the Bank of North Carolina. He is originally from Elizabeth City. He now resides in Edenton with his wife Carolyn and son, Jay.

At every regular meeting there are several very important issues to be voted on by the membership. Please plan to attend and cast your vote for the way you would like to see your post operated.

VA's Q & A Corner Q. I was unable to use my VA education benefits before my time limit expired. How do I apply for an

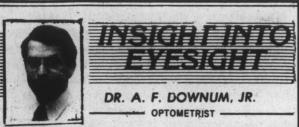

extension? A. The extension of the delimiting date for education benefits can be granted to veterans who can prove they were unable to pursue a course of education because of a physical or mental handicap, not the result of the veteran's own willful misconduct, during the period of entitlement.

Q. An error was made on my separation paper when I was discharged from military service. How may I have it corrected?

A. The secretary of a military department has authority to correct any military records. Applications for correction (DD Form 149) are available at any VA office.

For further information contact George Stokes, County Service Officer at

Some say that the phrase "rule of thumb" comes from a practice that was once common among brew-masters. The chief brewer used to test the temperature of a batch of brew by dipping in his thumb.

### When Side Vision Is Blurred

If you've noticed a blurred or shadowy area in your side vision, you should have your eyes checked to see if you have a detachment of the retina or if some other

oblem is causing it. When there is a detachment retina has separated from its normal position at the back of the eye. The retina is the inpermost lining of the eye and is a very delicate memand is a very desicuse brane. Because it receives the focused image entering the pupil, it is sometimes compared to the film in a camera. Except at two points, most of the retina is eld in position by pressure of the eve fluids. When it moves at of position this may cause ng as well as other toms Spots and flashes

for example, are sometimes an early sign of impending detachment.

Even a minor detachment of the retina should be treated as soon as possible because it will tend to increase and cause more serious vision problems. The best way to protect yourself from detachment of the retina and any other eye disease is to have eyes examined regularly by your eye doctor.

In the interest of better vision

Before your dentist

### Fixed Bridge To The Rescue

If you have one or more missing teeth creating gaps that should be filled,

you may want to consider

the fixed bridge. Missing teeth can do more than affect the shape of your face. They can also throw your other teeth out of alignment and cause other serious dental problems. If you choose a fixed partial denture to solve the problem, you'll have "new" teeth that will be permanently fixed in your mouth. You won't

have to take them out to clean them. They can be brushed and flossed (with, a little dexterity) the same way your natural teeth are to remove bacteria and food particles.

makes a fixed bridge, he'll check the health of the adjacent or supporting teeth and gums. They have to be strong and healthy enough to support the denture. Then he'll make crowns for the supporting teeth to make them even stronger. As a final step, the dentist will solder the crowns to the replacement teeth (called pontics) and cement the entire bridge into place.

'A public service with the aim of promoting better dental health environment. From the office of: RICHARD N. HINES, JR., D.D.S., 437 South Broad St., Edenton Phone: 482-2776.
