**Promotion Set
For Fishermen**

WASHINGTON, D.C. - Rep. Walter B. Jones, chairman of the House Merchant Marine and Fisheries Committee, has introduced legislation, H.R. 3255, which will include fish and fish products in the export promotion programs carried out by the U.S. Department of Agriculture.

"The United States' fishery trade deficit has increased 10-fold over the last 20 years, to \$2.6-billion in 1980. The vast amounts of fishery resources within our 200-mile Fishery Conservation Zone have been underutilized and their enormous export potential untapped by domestic fishermen faced with the lack of credit financing for the shipment of large amounts of raw product and a large, and often overwhelming, financial burden which is imposed on the exporter and importer while their relatively high-value finished products are in shipment or awaiting customs clearance," Chairman Jones said.

"This bill creates no new programs. It merely allows our underdeveloped fishing industry to benefit from the existing infrastructure which has aided export of American farm products for many years. Opening up these overseas markets will encourage the harvesting and processing of our resources by our American fishing fleet, reclaim ground lost to the heavily subsidized foreign fishing efforts in our FCZ, create jobs, and reduce our fisheries trade deficit," Chairman Jones added.
