## Here is Information of Value to Folks with Kidney Trouble

Spartanburg, S. C.—"I do not know of a medicine I feel so confident in recommending to my friends as Dr. Pierce's Acuric (anti-uric-acid) Tablets for relief from backaches and kidney and bladder weakness. Last summer I was feeling quite miserable with continuous backache. I could scarcely straighten up if I sat down or stooped over, and my bladder became so irritated that I was disturbed frequently through the night, thereby losing much necessary rest. A neighbor kindly suggested to me to try Dr. Pierce's Acuric Tablets and from the very day I started taking them I felt relief. I continued until my kidneys and bladder were in good working order and I have had no trouble with my back since."—(Rev.) John A. Ravan, 169 Reynolds St.

## TWO AND HALF YEARS TAKEN FROM SPAN OF LIFE COST OF TUBERCULOSIS

Something of the cost of tuberculosis both in time and money has been determined by Louis D. Dublin, Statistician of the Metropolitan Life Insurance Company. He has made an extensive study of fact, and figures pertaining to the thousands of policy holders in the industrial department of the company, and gathered over a period of five years.

An interesting fact revealed by the study is that tuberculosis is cutting short the life span of individuals two and one half years. In other words if tuberculosis were entirely eliminated and if other causes of death continued at the rate then prevailing, the result would be that two and one half years would be added to the life span of individuals.

That number of lost years, according to Mr. Dublin when translated into money value means a loss to the individual of two hundred and fifty dollars, or twenty-six and one half billion dollars to the nation. To phrase it differently, the present generation would add that much more net wealth if tuberculosis were entirely eliminated.

But for each death from tuberculosis, adds the writer, there are probably five or six persons who are constantly ill from the disease. The aggregate of these were found to be between twenty and forty-five years. For a large number work must be suspended entirely for a time and probably for all the working capacity is more or less impaired over a considerable period of time. This reveals a serious picture of economic loss, at an age when men and women should be at the height of their earning capacity and when deprivation of earn-

## Bible Thoughts for the Week

**Sunday.**  
HUMILITY OF CHRIST.—Let this mind be in you, which was also in Christ Jesus. Let nothing be done through strife or vainglory; but in lowliness of mind let each esteem other better than themselves.—Philipp. 2:3, 3.

**Monday.**  
LOVE DESTROYS FEAR.—There is no fear in love; but perfect love casteth out fear; because fear hath torment. He that feareth is not made perfect in love.—1 John 4:18.

**Tuesday.**  
OMNIPOTENT CARE.—The Lord shall preserve thy going out and thy coming in from this time forth, and even forevermore.—Ps. 121:3.

**Wednesday.**  
VALUE OF A GOOD NAME.—A good name is rather to be chosen than great riches, and loving favor rather than silver and gold.—Prov. 22:1.

**Thursday.**  
A SAFE RETREAT.—Be Thou my strong habitation, whereunto I may continually resort; Thou hast given commandment to save me; for Thou art my rock and my fortress.—Ps. 71:3.

**Friday.**  
A REAL FOOL.—He that trusteth in his own heart is a fool.—Prov. 28:26.

**Saturday.**  
HOW GOD LOVES.—For God so loved the world, that He gave His only begotten Son; that whosoever believeth in Him should not perish, but have everlasting life.—John 3:16.

## LOOK AT THE LABEL ON YOUR PAPER. IF BEHIND, PAY UP!

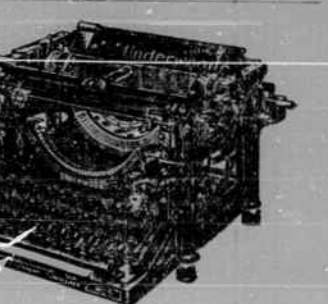

It is estimated that tuberculosis is costing North Carolina every year fifty million dollars. This is ten times the amount of the deficit said recently to exist in the State Treasury, which caused the public not only so great a concern but also an expensive investigation. It is four times as much as is spent to conduct the public schools of the State, and twice as much as the public school is valued. It is one-eighth as much as all the crops in North Carolina were valued in 1920. But thanks to

the forces at work in the State to eliminate tuberculosis, not only the number of deaths from this disease but the cost of it as well has been cut in half.

## The Railroads are a Barometer of Business

There is no better standard by which to judge business conditions and forecast the future than the volume of traffic being carried by the railroads. Because of the vital dependence of the railroads and general business enterprises, prosperity, or the lack of it, affects both of them alike.

Just now the factories of the nation are working almost full blast, and the farms are producing bounteous crops. The railroads are successfully handling an unprecedented amount of business, and the volume is steadily growing. These conditions not only denote a present healthy state of business activity, but foretell a continuation of our national prosperity.

The L. & N. is increasing its facilities to take care of increased traffic demands in order that general business may move unhampered. The L. & N. has appropriated during the past year, over \$9,000,000 to improve its service. It recently purchased over fifty thousand tons of new rail costing over \$2,100,000. Consider these and other facts before you give approval to the destructive regulatory measures now being proposed. Help to keep the barometer of business from falling.
