Farmers and Factories Build Communities
 Farmers are community builders. They produce wealth from the soil. When farmers are prosperous, people in other lines of business prosper and the whole community is benefited.
 Factories are community builders also. Since a great part of their output is usually sold in other sections of the country, factories bring lots of money into the communities in which they are located. They furnish employment to many people; and their payrolls circulate among the tradesmen, artisans, and professional men, bringing increased prosperity to all.
 The Louisville & Nashville Railroad, thru its Immigration & Industrial Department, has for years been assisting in community building in this territory by getting industrious and desirable farmers from other sections of the country to locate somewhere along or near its tracks; and by means of personal instruction in the field and the issuing of special bulletins on the growing of certain crops, etc., has helped these newcomers to achieve success.
 Thru the efforts of this Department, many factories have been located along this railroad and much wealth has thus been added to this territory.
 An extensive campaign of advertising, setting forth the advantages of this territory for farmers and factories is now being carried by the L. & N. in farm and industrial magazines with national circulation.
 The work of its Immigration & Industrial Department is but one example of the L. & N.'s constant effort to further the progress and prosperity of the wonderful Southland territory opened by the L. & N. Railroad.
