TRY OUR JOB PRINTING

You can get the most food value out of wheat by eating bakings that are made from good plain flour. A dependable baking powder must be employed or you do not get the full nutritious value of the wheat—nor will your bakings be as palatable and easily digested.

The same results cannot be had if you use Self Rising Flours, which are improperly packed in porous sacks or bags, thus allowing absorption of moisture from the air. Food authorities and physicians agree that bakings that do not raise properly are bad for health. Such foods are hard to digest and in time cause stomach trouble.

Mothers who are interested in the proper growth and health of their children (and all mothers are) should never use anything but a good brand of plain flour and a time-tested leavener such as Calumet—the economy Baking Powder.

Calumet has more than the ordinary leavening strength. It raises every baking to its height of nutritious value. It is pure and dependable—do not look for a substitute—there is none.

Use Calumet and be positive of wholesome nutritious and economical foods.
