"HOME BUILDING IN FLORIDA"

Miami and suburban districts are experiencing the greatest boom in the history of that city. \$13,291,094 worth of building permits have been issued since January first, 1924, in **Miami** city alone, while in the suburban districts within a radius of eight miles from the center of the city fully \$8,000,000 more has been authorized.

The opportunities of **South Florida**, especially the **Miami** section, are numerous and business is established upon a sound basis. It is not a boom for a short period. **Miami's** building to stay, and real estate values have doubled and tripled during the last five years. Within the next ten years, it is reasonable to predict that **Miami** will be the largest and richest city in the whole **Southland**.

Among the most active suburban sections is **Biscayne Park Estates**, a beautiful sub-division owned and developed by **Arthur M. Griffing**, of the well known **Griffing Brothers**, who for the past 30 years have been classed among the foremost **Horticulturists** and **Nurserymen** of the **South**, and with his great knowledge and love of flowers has endeavored to make **Biscayne Park Estates** one of the finest flower gardens. **Stately Australian Pines** and **Eucalyptus** outline the streets and avenues inter-planted with **Palm, Hibiscus, Acalypha, Crape Myrtle** and other choice trees and shrubs, while roses bloom to perfection the whole year through in the rich soil covering the entire development.

Many beautiful homes and apartments are now in course of construction at **Biscayne Estates**, while fully a score are being planned for the fall building. These in addition to nearly a half hundred now occupied makes this restricted suburb one of **Miami's** leading residential sections and owners of lots are quick to see the advantage of owning in **Biscayne Park Estates**. Its location, 7 miles from the heart of **Miami** on the **Dixie Highway** and new inland waterway (which will be 75 feet in width by 12 feet in depth, connecting **Biscayne Bay** with **Lake Okechobee**), is all that could be desired.

Southern Florida is becoming recognized more and more each year for its incomparable climate. The winters are ideal in every particular, while the summer months are a revelation. The average minimum temperature during the summer months is 72 degrees, while the maximum is but 84. This shows a very even temperature and combined with low humidity and an almost ever prevailing breeze from ocean and gulf, make the summers most pleasant indeed.

Miami Suburban real estate investments are safe and profitable. Interesting literature may be had by applying to **Charles E. Waddell & Co., Inc.**, 1700 **Bank Building**, **Miami, Fla.**—Adv.
