Neglected Cough Dangerous—How to Stop It Quickly

When the delicate tissues of your throat are raw and sore from coughing, and your strength is exhausted with the constant hacking, you may fall an easy prey to more serious trouble. So stop the cough the quickest you can, before it creeps too deep. By a very simple treatment you can stop the spells practically at once, and relieve the heaviest cough often in 24 hours. The treatment is based on a remarkable prescription known as Dr. King's New Discovery for Coughs. You simply take a teaspoonful and hold it in your throat for 15 or 20 seconds before swallowing, without following with water. It has a double action: it not only soothes and heals soreness and irritation, but it quickly loosens and removes the phlegm and congestion which are the direct cause of the coughing. With the cough treated in this way, the whole cough condition goes in a very short time. The prescription contains no opiates or harmful drugs, it is entirely of natural origin. It is for coughs, chest colds, hoarseness, bronchitis and spasmodic croup. Very economical, as the dose is only one teaspoonful. For sale at all good druggists. Ask for
