

HOLOMON GIVES GRAPHIC ACCOUNT OF ELLIJAY MEET

(Continued from page 1)

the Union County Good Roads Association, at Blairville, recently. Judge Jones adjourned court after his charge to the grand jury and ex-Senator Harralson and Representative-elect B. H. Stone took charge of the meeting. The court room was crowded, and there again I found a spirit of progressive cooperation that was inspiring.

For a long time the people of Georgia on the north side of the Blue Ridge were bottled in and without adequate highways.

There is being built through Blairsville one of the outstanding scenic highways of America—the Georgia mountain link of the Atlanta-Murphy-Asheville highway. It is also one of the great engineering feats of Appalachian road building. Every foot of the highway over the mountains from Cleveland, in West

county, to the North Carolina line, is to be surfaced with water-bound macadam. Many miles of the permanent surface is already down, and the entire highway has been brought to a 6 per cent grade, wounding around the mountains in as picturesque settings as are to be found in this country.

The economic value of this road to all the counties it touches cannot be estimated.

In addition to this a permanently paved highway is being constructed from Blue Ridge to Clayton, via Hiwassee, Young Harris and Blairsville, known as the East and West Road. This will be completed in a year or two but the Georgia link of the Atlanta-Murphy-Asheville highway will be officially opened on July 4, 1925.

The counties of Union, Towns, Lumpkin and White will give a barbecue at New's gap—the top of the mountain—on that day and preparations are being made for feeding 20,000 visitors. It is predicted not less than 10,000 visitors will go from Atlanta, including the members of the Georgia assembly. All of the North Georgia counties and east Tennessee and Western North Carolina will pour visitors to the top of the Blue Ridge on that occasion.

It is expected that prominent members of the federal bureau of roads will be guests of state highway officials on the occasion.

While north of the Blue Ridge on this trip it was my pleasure to talk to the student body of Young Harris college. What a wonderful school this is, with boys and girls and young men and women from a number of states assembled in the heart of the mountains to study, thus not only close to nature, but at one of the best-conducted colleges in this country.

The student body consists of around 400, and I have never seen a finer school personnel.

Such singing with the red blooded vim of the mountains! Such a glow of health on every cheek! Such a school spirit!

There is not a better school administrator in Georgia than Dr. Sharp, and he has gathered about him a faculty of men and women who not only know how to teach, but how to keep the "rah, rah, rah," college spirit alive in an atmosphere charged with physical fitness, educational alertness and spiritual consecration.

Ogreeta Sunday School Contributes To Near East Relief

By W. R. Martin

The second Sunday in April I began a campaign among the members of the Ogretta Sunday School to raise money for the Near East Relief. I asked them to bring their pennies, nickles and dimes each Sunday and contribute to this great cause, and in four Sundays we had the amount of \$5.00 made up.

Even the smallest of the children seemed delighted to contribute their pennies and nickles when told that they were helping other little children to get something to eat and to wear.

Five dollars, though a small amount, if each Sunday school in the county according to membership, and financial ability would do likewise the four hundred and fifty dollar quota for the county could be easily raised, and no one would miss the amount given, but the greatest of all it would be doing our indispensable duty.

No person, whether Christian or non-Christian, should refuse to help relieve the sufferings of orphan children, who have been born into a cruel world, and since deprived of a mother or father to bring them up in the way they should go.

Many of them have died already for the want of food and clothing, and I fear that we, as Christians, and knowing their condition will be held responsible for their loss, and disobeying the command of Christ, but if we are willing to help save those who are still living from a similar fate, perhaps it will help to redeem us of our past neglected duties.

Christ loved little children, and He rebuked His disciples when they sought to keep the children back, He said, "Suffer little children to come unto me, for of such is the kingdom of Heaven." Children are yet the symbol of the Kingdom of Heaven, and if we cannot to love Christ, we must love and care for those whom He loved.

The orphans of the Near East are as truly in distress and need as was the man who fell among thorns on the road to Jerico, and if America is a Christian nation she should be the Good Samaritan.

Christ performed no fantastic or absurd miracles for mere effect, such as are reported of Buddha and the various Hindu Deities. All of His miracles had one great objective: to restore to normal. The hungry were satisfied, the lame walked, and the blind saw.

The program of the Near East Relief is conceived in this same spirit, to restore to normal life and normal conditions. The Near East Relief is both father and mother to those children. It feeds them, it sends them to school, and cares for them when they are sick.

I don't believe there was an American citizen in all this fair land of ours that would not have gone to the rescue of Floyd Collins when he

No Account Generally

Mrs. P. D. Nelson, of Lake Charles, La., writes, "It was along time before we found out what was the matter, I wanted to sleep all the time, suffered with my eyes, headache and headache. Had no energy and was no account generally."

Doctor examined me and said I had Bright's Disease, but could do me no good. I took Hebo Kidney and Bladder Remedy and was healed."

The Hobo Medicine Company, Beaumont, Texas, guarantees a treatment of six bottles to give entire satisfaction or they will refund the \$6.00.

Price \$1.20 per bottle or six bottle for \$6.00.

For sale by all druggists.

was entrapped in Sand Cave, Ky., if they had thought they could have saved the explorers life. Even the chief executive of the state offered to render any assistance possible, for they all knew that Floyd would die if he was not rescued, so we should show the same Christian spirit toward those orphan children, for we ought to know that if they are not fed and clothed they will also die.

Let us quote a few lines from Gilpin, on kindness: "I shall pass this way but once. Therefore, any good thing that I can do, or any kindness that I can show to any human being, let me do it now. Let me not defer it, or neglect it, for I shall not pass this way again."

Following are the members of the Ogretta Sunday School who contributed to the Near East Relief:

Table listing names and amounts contributed to the Near East Relief, including S. F. Chambers, Glen Chambers, Vicie Chambers, Lizie Chambers, Robert Chambers, J. N. Chambers, R. J. Chambers, J. P. Johnson, Effie Johnson, Joe Johnson, Edgar Johnson, Oscar Johnson, Lovina Johnson, Vay Johnson, W. R. Martin, Fred Martin, Gwen Martin, Kermit Martin, Aliene Martin, Pauline Martin, Robert Martin, May Martin, Wade Martin, Ella Coleman, Addie Coleman, Ethel Coleman, Anderson Whitner, Nina Whitner, Alfred Whitner, W. W. Bryson, George Bryson, Garfield Whitner, Gover Whitner, Nina Bryson, Fannie Odum, Daley Hall, Benjie Hall, Shell Stratton, J. T. Martin, Boyd McDonald, Lee Morrison Martin, David Kidd, Jane Martin, Elsie Whitner, Leonard McDonald, Ambrose Worley, Milton Phillips, Gwen Phillips.

Total \$5.00. Let us hear from some other Sunday schools, please.

W. R. MARTIN.

Southern States And Counties High In Textile Ranking

Washing, D. C.—Southern states and counties moved forward in the textile ranking contained in the annual report of the U. S. Census office for the year ended July 31, 1924, in which are listed all counties having more than 100,000 cotton spindles, according to the census report by the Development Service of the Southern Railway System.

North Carolina with 5,881,366 spindles is second in the United States, Massachusetts still holding first place with 11,792,160. South Carolina with 5,266,378 is third, Georgia with 2,798,242 spindles is fourth.

Gaston county, N. C., with 1,110,260 spindles, a gain of 157,208, is the first Southern county to pass the million mark and is now the fourth county in the United States in number of spindles, being exceeded only by three New England counties each of which showed a decrease for the year.

Of the 73 counties in the United States with more than 100,000 spindles, 21 are in North Carolina, 14 in South Carolina, 8 in Georgia, 5 in Alabama, and 11 in Louisiana, Tennessee and Virginia. Four Southern counties—Gaston, N. C., Spartanburg, S. C., Greenville, S. C. and Anderson, S. C. have more than 500,000 spindles in each county.

The relative prosperity of the industry in the South is shown by the fact that North Carolina worked 17,332,650,667 spindle hours and South Carolina 16,605,845,797, while Massachusetts with more spindles in place than the two Carolinas combined, worked only 17,762,675,016 spindle hours.

R. F. Collins of Wake county bought a brood sow for \$100 and sold \$900 worth of pigs from her in three years. He believes in swine growing, reports county agent J. C. Anderson.

Heavier Rail Program Continued By The Southern

Atlanta, Ga., April 14—Heavier rail was laid on 195 miles of track during 1924.

Of this total, 412 miles of track were laid with new 100 pound rail more than doubling the mileage of 100 pound rail in service; 85 pound rail was laid on 325 miles of track, and rail of other weights was laid on 58 miles of track, rail of heavier section being replaced in every case.

The 100 pound rail was laid in double track main lines carrying the heaviest traffic, and at the end of 1924 the Southern Railway System had a total of 728 miles of track laid with 100 pound rail.

The program of heavier rail laying is being actively continued and for the year 1925, 37,299 tons of 100 pound rail have already been laid. Also 29,798 tons of new 85 pound rail have been bought, enough to purchased, enough to lay 233 miles, lay 155 miles.

Acre Of Clover Worth Over \$50

Raleigh, N. C., April 27—A few days ago J. E. Sellers, a farmer of Alamance county, refused fifty dollars for red clover growing on one acre of land. Mr. Sellers has excellent prospects for ten acres of red clover this year. The same field was in clover two years ago. At that time he limed the field with fairly good results. However, he used a grain drill for applying the lime and this machine failed to put out the material heavily enough. A visit to another lime demonstration convinced him that he needed more lime.

"Accordingly," says E. C. State Extension Agronomist for the State College of Agriculture, "Mr. Sellers applied a ton per acre to the field that fall, and sowed it back to wheat and clover. He used 200 pounds of 8-2-5 fertilizer per acre with the wheat, and 200 pounds of acid phosphate with the clover seed. This time the clover was so good that it began to attract attention as soon as the wheat was off the field."

"Recently a tobacco farmer driving by saw the clover. He stopped and offered Mr. Sellers fifty dollars for an acre of it, and said he would cut and handle the hay himself. This was a tempting offer. The crop had not cost over fifteen dollars an acre to produce; however Mr. Sellers figured that while the hay might not be worth fifty dollars for feed, by selling it he would lose the manure value as well as the feeding value. Mr. Sellers stated that he was making every effort to build up this land and in order to be successful he knew he must put everything possible into the soil, and take as full as possible away from it."

Control Insects And Diseases By Spraying Fruit Now

Raleigh, N. C., April 27—To control apple worm and other insect pests and diseases, apple trees should be sprayed from April 26 to 30 with either the standard lime sulphur solution or the 3-4-50 Bordeaux mixture.

Peach trees should be sprayed during the same period with either the self-boiled lime sulphur or the dry mix lime sulphur to control brown rot. The dry-mix solution may also be used on apples, where only a few trees are to be sprayed.

To make the self-boiled lime sulphur, G. W. Fant, Plant disease specialist for the Agricultural Extension Service at State Colleges, advises, "mix 8 pounds of sulphur with enough water to form a thick paste. Put 8 pounds of fresh stone lime in a barrel with enough water to about cover it and as soon as the lime begins to slake add the sulphur paste. Stir the mixture constantly and add water to form a thin paste. As soon as it is well slaked, water should be used to cool and prevent further cooking. When cool add water to make 50 gallons."

"For dry-mix lime sulphur use 7 pounds hydrated lime, 5 pounds sulphur and 8 ounces Kayso (calcium arsenate). This should be thoroughly mixed and water added to make a thin solution which will readily pass through a strainer into the tank. Fill the spray tank about half full of water and strain the solution into it. Add water to make 50 gallons. A quart of lead is used at the rate of one pound of powder or two pounds of parts to each 50 gallons of solution. If a greater supply than 50 gallons is needed the ingredients should be used in proportion."

Cameron Morrison Chairman OF N. C. In Distribution Campaign

Atlanta, Ga., May 4.—The appointment of Cameron Morrison, former Governor, as Chairman of North Carolina in the nation-wide distribution of Confederate Memorial Half Dollars, minted by the United States Government, in "honor of the valor of the Southern Soldier," was announced today by Harvey J. Hill, Director General of coin distribution.

Under the direction of Mr. Morrison a state-wide organization consisting into every county will be created, having as its object the placing of one or more of the Memorial coins in every family.

Owing to the fact that there are only 2,500,000 coins of a special Confederate issue available, it has been necessary, Director General Hill announced, to make official allotments to each state based on population. The demand for coins reaching national headquarters already indicate a large over subscription of the issue. Distribution, therefore, is to be made on the basis of coin certificates redeemable on July 3rd at commercial banks throughout the South for the actual coins.

Prior to that date coin certificates are being sold through commercial banks and through volunteer sales organizations organized in various communities.

With the appointment of Mr. Morrison in North Carolina popular organizations in all states east of the Mississippi River has now been effected, Mr. Hill declared.

The organization erected in each state have a quasi-official status, since state chairmen in each instance have been appointed by the governors, who have taken a deep personal interest in making the coin distribution the greatest patriotic demonstration that has taken place in the South since the war.

CARD OF THANKS

We wish to thank our friends and neighbors for their many acts of kindness and words of comfort during the illness and death of our dear mother, Mrs. Margaret P. Axley.

THE FAMILY

The child needs all six of these foods included in his meals each day: milk, eggs, vegetables, fruit, whole grain cereals and butter and cream, say home economics workers of the State College of Agriculture.

Castile Hawkins Lost Two Fingers Friday

Mr. Castile Hawkins, of the Hawkins Bros. local shuttle block manufacturers, lost two of the fingers on his left hand last Friday when a block which was he was sawing caught against the saw and knocked his hand into the saw. The two middle fingers were completely severed between the joints were in such a mangled condition that the physicians thought it best to amputate them at the middle joint.

The other fingers and thumbs also received several minor cuts. Mr. Hawkins suffered severe pain for several days as a consequence, but he says that they are healing rapidly and it is hoped that no complications will set up.

Get the bugs before they take the garden. Don't nurse the vegetables along to maturity and then let insects or diseases take them.

FOR OVER 40 YEARS

HALL'S CATARRH MEDICINE has been used successfully in the treatment of Catarrh.
