A USED CAR IS ONLY AS DEPENDABLE AS THE DEALER WHO SELLS IT

Veteran cars shed their carbon New lubricating oil proves it with Buicks, Packards and others

TEST on a Buick for carbon deposit with the new "Standard" Motor Oil showed amazing results. When the car was examined before the test there were heavy accumulations of carbon on cylinder heads and pistons. The new "Standard" Motor Oil was then put in the crank-case and the car run 2,969 miles. Again it was examined. Most of the carbon had disappeared-the slight amount remaining was easily wiped off with a cloth.

The new oil is a perfect all 'round lubricant, giving a complete piston seal; smoother operation at all speeds; cooler motor; increases in oil mileage of 12% to 40% and in gas mileage of 10% to 20%.

Verify these astounding results with a crank-case full of "Standard" Motor Oil in your own car. You can actually feel the difference.

7 Advantages of "Standard" Motor Oil

- 1. Constant lubrication.
- 2. Minimum friction.
- 3. Less "breaking-down" under load or at high
- speeds. 4. More miles per quart of
- 5. Better hill climbing-smoother operation
- 6. Negligible carbon.
- 7. Actual saving in gasoline.
