**NOISE CUTS LIFE.
THAT VEHEMENT FLAME.
WORLD MONEY LENDER.
FARMERS NEED CANALS.**

Dr. Bundeson, Chicago's Health Commissioner, says human life would last seven years longer, on the average, if nerve-destroying noises were eliminated.

We think we are "used" to a certain noise, but use up as much energy conquering noise, crowding it out of the brain, as in doing real work.

Millions of brains are cut down 30 to 60 per cent in efficiency by noise. Absence of noise means greater efficiency, less wear in machines. But men pay no attention to their own machinery, worn away by noise every day.

And to complain of noises is considered effeminate. If unnecessary noise were accurately classified with assault and battery, life would be longer.

When the Bible says jealousy hath a most venomous flame, it doesn't exaggerate. Herdelle testimony given by a witness in the killing of Mrs. Mills in the Hill-Mills murder case.

The unfortunate woman after three bullets had been fired into her head, was severely mutilated. Her throat was cut twice, her tongue cut out, and there were other horrible wounds inflicted on the dead body. The tongue is supposed to have been cut out because the woman's singing had earned her a clergyman from his straight and narrow path.

The horrible case will again remind men that whoever stirs up jealousy stirs up danger. They have been reminded of it, often enough, for five hundred thousand years, by blows on the head with sharp flints, by poison in the Middle Ages, by pistols later. But they never seem to learn.

Wall Street is very proud of having "supplanted London as the world's money lender." This year the United States will lend more than a thousand million dollars in gold to foreign borrowers. In three years past this country has lent Europe four thousand million dollars. Gratifying, of course, but when will they get that money back?

London as world money lender charged usually moderate, and always legal, rates of interest. Our financiers lend money to Europe on a basis that makes the borrower pay at the rate of 13 per cent for the first year, as much as 7 and 8 per cent thereafter.

The usurer in many States loses principal and interest. Some of those American lenders will get unpleasant replies later when they ask for their principal. Meanwhile it is profitable for middlemen that get the "rakeoff."

All farmers and some Congressmen are wondering what "can be done for the farmer." The farmer says: "Guarantee me a definite price for my crops." Common sense says that invites overproduction, such as now breaks the price of cotton.

With wheat at \$1.40, farmers will increase their acreage by 15 per cent. How much wheat would they plant were the price \$2.49, which the farmers feel they ought to have? And where would the Government get money to buy the surplus \$2.49 wheat?

Farmers can help their wheat situation by backing Secretary Hoover's plan for a canal to the Gulf through the Mississippi Valley and another from the Great Lakes to the Atlantic ocean.

That would make every bushel of wheat worth from six to eighteen cents more.

Since the war railroads have raised rates six to eighteen cents a bushel, and surplus American wheat on its way to Liverpool pays that tax.

Argentine and Australian wheat has the six to eighteen cent advantage per bushel over American wheat at Liverpool, where the price is made.

A nine foot canal from the lakes to the gulf would send freight in barges carrying a thousand tons, as against box cars carrying fifty tons, hauled by a tugboat instead of a locomotive. And ten such barges, carrying ten thousand tons, would require no more men than one of the old-fashioned river boats carrying one hundred and fifty tons.

MAN WANTED FOR THIS COUNTY. Our remarkable plan means big profits for you—\$40 to \$100 weekly—big line of household necessities sold house to house—prices extremely low—your profits big. Every home a prospect. Car or team needed. Experience unnecessary. Salesmanship taught FREE. Write today for our new plan.
