HILDREN'S USTORY

THORNTON W. BURGESS

kless tongue is quite the worst I the things I know.

And let your tongue be slow.

A QUICK tongue is apt to be a reckless tongue, and a reckless tongue is one that says things without stopping to think if they be true out stoppings or of what harm they may do by be log repeated. The tongues of some people seem to be reckless all the time. Gessipy tongues almost always are reckless. Other tongues become are reckless when their owners lose their tempers. It was this way with the tongue of Longlegs the Eeron that beautiful summer day. Longlegs lost his temper and then he said things which he wouldn't have said if he had which he wouldn't have said if he had stopped to think.

You see Longlegs was very hungry and he waited patiently for a long, long time for his breakfast. You know Longlegs is a fisherman, and he is one of those who wait for their meals to of these who want for their means to come to them instead of going after them. Little Joe Ofter is a fisherman, but he is the other kind. He is such a famous swimmer that he can chase and catch fish. Longlegs isn't a swim-mer at all, so he has to wait for the fish to swim near enough to where he is standing for him to catch one by darting his long neck downward like lightning and snapping up the fish in his great spear-like bill.

So on this particular morning when onglegs had waited and waited so Longlegs had patiently and at last a school of min-news had come swimming in almost within reach it had been more than he could stand to have Rattles the Kinglisher suddenly dart down and selze the biggest minnow Longlegs had counted as surely his, at the same time frightening away all the other

You're a thief!" he screamed at Rattles. "You're a robber! That was my fish"

Rattles the Kingfisher chuckled. It wasn't a pleasant chuckle to hear e Rattles hasn't a pleasant in fact it is a very unpleasant voice. He didn't reply at once be-cause he was too busy swallowing that big, far minnow. It was so big that it stuck in his throat, and he had to twist and squirm and wriggle and

guip and gusp to get it down. But at last it was down. Then he looked across at longlegs and chuckled again. "If it was yours why didn't you catch it?" he asked. "I didn't even know you were over there. Not that it would have made any difference. know you were over there. Not that it would have made any difference,' he added with another harsh chuckle,

Rattles the Kingfisher Chuckled.

for fish belong to whoever can catch them, and that fat minnow didn't be long to you because you hadn't caught it."

"It did too!" retorted Longlegs, and his voice was as harsh as Rattles' voice. "I was just going to catch it when you stole it. You're a thief, I tell you. I'm going to tel! everybody that you're a thief. You siole my breakfast!"

Rattles chuckled again. having that big fat mirnow in his stomach he simply couldn't lose his temper. You know, temper is very largely a matter of an empty stomach. The stomach of Longlegs was empty and so his temper was very, very bad, while the stomach of Rattles was full, and so his temper was very, very

"Go, ahead! Go ahead. Longlegs!" "Go, ahead! Go ahead. Longlegs!" said he. "You tell everybody that I'm a thief, and I'll tell everybody that you are a long-legged, long-necked, cross-grained, bad-tempered, lazy domothing, who waits for his meals to come to him instead of going after them. Everybody knows that I never stole anything in my life, and everybody knows that you are just what I have said you are. It is true I haven't many friends, but it is because I don't want them. But it is just as true that you haven't either. cause I don't want them. But it is just as true that you haven't either. It is easy enough to call names, and I guess I can do that as well as you can. So go ahead. Calling me a thief doesn't make me one, and you know as well as I do that that minnow didn't belong to anybody until it was caught. Just to pay you for losing Jour temper, I'm going to stay right

Americans on Old Caravan Route

A. LEE, of New York (center), formerly of Pittsburgh and Cleveland, and A. A. F. Kane of Milwaukee, as they appeared with their small native attendant and pack mule, en route from China to India via an old Chinese caravan route. The party journeyed overland from Saigon, French Indo-China, to Calcutta, and is shown halting for a swim in western Yunnan, China,

Setting New Record

here by the Smiling Pool, and you ought to know, if you don't, that I can beat you fishing every time. If you'll take my advice you'll go over to the Big river. You'll fill your stomach sooner there, and then you'll

Longlegs opened his mouth for an angry retort, then closed it without saying a word. He knew that what Rattles said was true, and to tell the truth he was a wee bit ashamed. Finally he spread his big wings and Finally he spread his big whigs and flapped away in the direction of the Eig river. Rattles the Kingfisher chuckled noisily. Then he fixed his bright eyes on the Smiling Pool to vatch for minnows.

No Good for Him

A soft answer may turn away wrath, but never an insurance agent.—Chi-cago Evening Post.

AN OLD MAN'S **ENVY**

By DOUGLAS MALLOCH

A LL an old man's tasks are done, All his races have been run.

Now he sits beside the fire. Old Grandsire, Little now his limbs to tire.

All of youth's task lie ahead, Roads to tread, Things to master, and to dread.

Age is like an ancient mill. Gray and still,
All the grist ground that it will.

Youth can never quiet sit, Smoke a bit. With all life ahead of it.

Youth must up and on its way. While the gray
Sit and think and smoke all day.

Youth must up and sow the grain, Shift the crane And I hear youth's voice complain.

All an old man's tasks are done, Let me tell you this, my son:

Nothing would seem hard to do

If you knew How an old man envies you. (B. 1932, Pouglas Malloch.)—WNU Service

JUST A FEW SAUCES

A WELL made and appropriate sauce will take an ordinary meat dish out of its class, making it a real creation. The following are a few that are different:

Breton Beef Sauce.

Take one tablespoonful each of sugar, horseradish and made mustard, mix with four tablespoonfuls of vin-

Lamb Sauce

Pour one-fourth cupful of boiling wa-ter over four tablespoonfuls of chopped mint leaves, let stand until cold, then add two tablespoonfuls of vinegar and enough orange marmalade to make a thick sauce.

Unusual Meat Sauce

Mix together two tablespoonfuls of brown sugar, one teaspoonful of grant-ed chocolate, one-half cupful of pre-served currants, one tablespoonful of shredded orange peel and the same amount of capers. Pour over these ingredients a cupful of vinegar and let stand for several hours. Before serv-ing strain off the extra vinegar.

Olive Sauce.

Mix together one tablespoonful each of melted butter and flour, add one cupful of good stock. Stir and cook until smooth and thick. Add a scant teaspoonful of worcestershire sauce and one dozen finely chopped olives. Sea-son with a little salt and pepper. Let mixture simmer gently for three minutes.

Egg Sauce for Fish.

Mash the yolks of three hard cooked eggs with two tablespoonfuls of butter, one tablespoonful of rich cream and two tablespoonfuls of lemon Juice. Another is prepared with a white sauce, two hard cooked eggs chopped fine and salt and pepper to taste. Al-low two eggs to each pint of white sauce. This is good served with cauliflower.

Sets High Standard for Pig Marketing

Record of Illinois Farmer Cited as Example.

Whereas few farmers raise more than 70 per cent of the pigs farrowed, Charles B. Shuman, a graduate of the college of agriculture. University of Illinois, has hung a record during the past three years of raising and selling S4 per cent of the pigs farrowed on his Moultrie county farm.

His rate of marketing has run so high that during the three years his sales have averaged almost eight pigs a litter. Out of 508 pigs farrowed in 62 litters, he has sold 475. He is cooperating with the extension service

operating with the extension service of the college in demonstrating swine anitation and other approved prac-

tices.

Last summer Shuman fed 52 head and sold them September 23, when they were six and a half months of age, averaging 204 pounds each. They paid well for their feed. They were fed corn, wheat, oats, tankage and soy bean oil meat. They used 391 pounds of feed for each 100 pounds' gain, according to the report which Shuman made on them to E. T. Robbins, live stock extension specialist of bins, live stock extension specialist of the college.

How to Make Effective

War on the Groundhog

Groundhogs cause damage both by eating the crop and by the piles of stones and gravel which spoil the mower blades.
Readers are asking how this pest

may be destroyed. Guns and traps are most in use. Carbide gas may be used, but is not effective unless all the holes are well scaled. One of the cheapest and easiest methods, if one has a car, is to use carbon monoxide gas. This gas, which is very danger-ons, is made in the motor and is released through the exhaust pipe.
First block all the holes so that they

are as airtight as possible and pre-vent the animals from escaping. Drive the car up to the main hole, and in this place the end of a rubber tube, the other end of which is attached to the exhaust of the motor. Leave the motor running for about twenty minutes, which should supply enough to kill the pests. Readers who have had experiences in this or other methods of eradication are invited to report on results.--Montreal Family Herald.

Hot-Weather Pests

Warm weather arouses the reproductive instinct of thes. By midsummuctive instinct of files. By midsummer it would seem as if nature has overdone the job of guaranteeing the perpetuation of the species. Certainly it doesn't take so many to be assured of breeding stock from year to year, considering their prolific tendencies.

Warm weather also arouses the acof harmful bacteria, We are thinking now of those that cause milk to sour, making it unfit for food. Care-less handling of milk in warm weather is just as certain to invite trouble as the certainty that sunset will follow sunrise. Clean cows, clean milking, clean utensils, and prompt cooling prevent these bacteria from doing their

But flies? How shall we keep their filthy feet from contaminating our food and from torturing our cows? Make it tough for them to find suitable breeding places. Coax them into fly traps. Knock them stiff with fly spray.—Hoard's Dairyman,

Silo Will Beat the Frost

Ensiling corn saves the entire crop. The man with a silo does not dread the early frost, for his sile is ready to receive leaves, ears and stalk. Dry corn fodder which has not lest its leaves, or which has not been leached fall rains, is excellent feed-but ses are inevitable and can be avoided by ensiling the corn. Ensiling should take place when the kernels are in the glazed stage. The glazed stage is reached when the seed coat has become somewhat shiny, and when the starchy part of the kernel is firm enough to rub up into meal when this starch is removed from the kernel and rubbed between the fingers,-Dakots

Sowing Millet

It would not be advisable to seed millet, alfalfa, timothy and clover together. Millet is calculated for hay and the plants grow very thick, requir-ing a good deal of available fertility. All of this would be detrimental to seeding out with the clovers and grass. The same objection may be given for not seeding down with sudan grass. The earlier the grass and clover seed can be sown the better for a good catch and stand. Barley is a good nurse crop. Sometimes land is seeded out about the time millet and sudan grass is sown but the clover and grass seed is sown alone and gets off to a sufficient start to be all right for entering the winter conditions safely.
