Optical Illusion? What? Will A Car Roll Up Hill?

(By William Murphy) (From The West Asheville News) Did you ever see a car coast uphill—well, I have. No fooling, no kidding, but the honest sincere truth I and several others actually saw an automobile stop completely at the bottom of a hill and with the motor cut off, slowly start up hill and gain speed as it reaches the top.

Now for another surprise. There is not only one hill but two. One of the hills is about 25 yards in length and the other is of about 30 or 35 yards distance, and both pull the automobile equally well.

These hills are located on the Robert Inglo and John Coleman farms on the old Starnes Cove Road after you leave the pavement. It is exactly 6.1 of a mile from the West Asheville News office doors.

TO THE VOTERS OF CHEROKEE COUNTY:

I take this method of expressing my sincere thanks to the voters of Cherokee County for their loyal support in the 1934 election and to ask for your vote and influence once more on Nov. 3rd, 1936.

Since I have been serving the people of Cherokee County as Register of Deeds I have tried as best I could to give the people an honest, upright, business-like administration in that office.

If I have succeeded in this respect I feel that I am entitled to a second term and if I have failed to do this, then and in that event, it becomes the duty of the voters of this county to support me no more.

I have tried to be very careful in my work and have spared neither time nor effort to do my work in a way so that neither myself nor my constituents would hereafter be embarrassed or caused any trouble in any way on account of my negligence.

In whatever capacity I work my greatest desire has always been to give satisfaction. If this is the kind of man you want for your Register of Deeds for another two years vote for me on November 3rd.

Once more thanking you for your support in the past, I am

SINCERELY YOURS, R. L. KEENUM
