

CCC Camps Are Reassigned To WNC Mountains

Joseph C. Kircher, Regional Forester, Atlanta, Georgia

The construction and betterment of 350 miles of roads and trails, timberland improvement on 20,000 acres of land, and the completion of a rearing station that will care for 20,000 fish annually are among the major projects to be undertaken by the twenty-eight camps assigned to forestry work in North Carolina during the eighth enrollment period of

MORE JOBS AND BIGGER PAYROLLS REPORTED IN N. C.

Washington, Nov. 25.—Increasing payrolls and more jobs for workmen in North and South Carolina were reflected Sunday in Secretary Perkins' industrial employment report for October.

A payroll increase of 3.3 per cent during October was reported in North Carolina industrial plants while in South Carolina an increase of 3.5 per cent was noted.

The report listed 154,494 persons on industrial payrolls in North Carolina in October and 71,345 in South Carolina. The weekly payroll in the Tar Heel state was reported at \$2,330,092 while in South Carolina it was reported at \$1,000,812.

When fire destroyed a New York animal store, a baboon took a kitten in its arms and carried it to safety.

the CCC, according to an announcement by Joseph C. Kircher, Southern Regional Forester, from his headquarters in Atlanta, Georgia.

Mr. Kircher said that the North Carolina forestry camps had been assigned as follows: ten to the Pisgah National Forest, seven to the Nantahala, two to the Sumter, seven to projects on state and private forest lands, and two to forestry work for the TVA.

Among the important forestry projects already completed by the CCC in North Carolina, Mr. Kircher listed nine fish-rearing pools on the Nantahala National Forest, 14,000 mandays in roadside planting to control erosion and reduce silt in trout streams, and the construction of fifteen camping and picnic grounds for general public use.

Thousands of acres of national forest land in North Carolina has been worked over by the CCC enrollees to release fine young trees from surrounding tangles of growth and give them a chance to develop into high grade timber for market. Measurements have been taken through the removal of underbrush and the destruction of certain shrubs to protect thousands of acres of trees from fire, insect enemies, and fungus diseases. Twelve thousand mandays have been spent in suppressing forest fires.

A recent census of the deer population of the Pisgah Game Preserve undertaken with the aid of CCC enrollees fixes the number at 8,000. The Pisgah Preserve, Mr. Kircher stated, is playing an important part in the game rehabilitation program of the Forest Service in the South because hundreds of the fawns now being used for restocking purposes on other Southern national forests are raised in this preserve.

BATES CREEK

Rev. Nichols failed to fill his regular appointment here Sunday.

A large crowd of young folks enjoyed Lee Dockery's new records Sunday.

Mr. Garland Dockery was the supper guests of Mr. and Mrs. Vance Dockery Sunday night.

Miss Edna Mae Coleman was the Sunday dinner guest of Misses Nettie Kate and Grace Dockery.

A large crowd of young folks were present for Mr. Frank Smith's carving lessons at the school house Thursday night. They are studying flat carving at present.

BATES CREEK SCHOOL

Bates Creek met the basketball teams of Peachtree on the Bates Creek court, November 20. Victories were divided. Bates Creek won over the Peachtree girls 17 to 11, while the Peachtree boys won 19-16.

MR. E. C. WHITE...

(Continued from page two) she bundles up, leaves her task and goes to grand opera. She has attended in Atlanta, alone 12 times. She knows music and its history, and there are a few points in literature to which she has not traveled in this country." Mr. Dickey knows "Miss Nora" for he was one of her best pupils.

A new, small, but classic in design Baptist church house stands on an eminence near her home as a monument to her faith in God and her generosity to her neighbors. There were never any children born to these two loving hearts, but Professor and Mrs. White have adopted two sons of a niece by Mrs. White's and helped them to come to young manhood in a fine way.

So many who study music find it hard even with two good eyes to follow the notes with the sight and the keys with fingers, but Edwin Gray White had to read off his notes from raised point letters and then go to the piano to play it off from memory.

After he had progressed to a certain point, he would have his friends read his music lesson to him, just as one reads the newspaper, and then he would go to the piano to practice it from the entire reading of one piece or whatever the lesson might be for that time. Hard work and constant application were the price he paid for his ability to teach.

Mastered Classics
Among the best loved of his numbers learned in this way are, Beethoven's Sonata Pathetique, and Chopin's Ballad in A Flat, Opus 46. A number of his own compositions were published, among which were Forest Echoes and The Asphodel.

Following his four years work at Bellevue, he taught in Orangeburg college, S. C., for nine years; at An-

niston, Ala., in a college for young women for two years; then in the city schools of Lowndesville, S. C., and at Etowah Institute, Canton, Ga., where he had as many as 43 pupils the sixth and last year. From there, in his 70th year, he retired to private life and the home that had come to be so dear to him through the years.

Though not tall of stature, Professor White is very erect with something of a martial air in his walk. His living has been along very methodic lines and certainly most temperate in habits. He uses no tobacco. With a bit of pride, he said that in all his long tenure of teaching, 42 years, he had never lost a day from his work on account of sickness.

The Whites have not had electric lights in the home, which they so easily might do; but they have a telephone, radio, and water works. Along with four-poster beds, high boys, and hand-woven coverlets of exquisite designs, Mrs. White prefers the soft light from the hand-filled oil lamps that perpetuates the memory of her young life with her mother who sat at night at her loom weaving by lamp light.

With the Reader's Digest, an Episcopal religious paper, the Radio Guide in Braille, and the radio near, Professor White has no heavy time on his hands. With the Bible, books on psychology, and musical textbooks also in Braille, he carries on his habits of study.

This question: "Why is it that the Baptist denomination has no current reading in Braille?" sets on thinking

as to the lack in our religious life for those who cannot see. The work among the deaf mutes is far reaching and there is hope that soon there may be a periodical for the blind.

LEGAL NOTICES

No. 8652
ENTRY OF LAND—DESCRIPTION
NORTH CAROLINA.
—CHEROKEE COUNTY.

To R. L. Keenum,
Entry taker for Cherokee County:
The undersigned W. F. Krickhan of Buncombe county, North Carolina, enters and lays claim to the following described piece or parcel of land in Shoal Creek Township, Cherokee County, State of North Carolina the same being vacant and unappropriated land, and subject to entry, viz:

On Hiwassee River.
BEGINNING at a point in the North Carolina-Tennessee state line, and in the center or middle of Hiwassee River, where said state line crosses said river, 600 feet, more or less, below the mouth of Cane Creek, and runs up and with the center or middle of Hiwassee River, as it meanders in a southerly direction, to a point in the center or middle of said river, in the North Carolina-Tennessee state line; thence with said state line north to the BEGINNING, containing by estimation 18 acres.

(Signed) W. F. Krickhan,
Entered this 12th day of November, 1936.

I'M A NEW WOMAN THANKS TO PURSANG

Yes, Pursang contains elements of proven value, such as Organic Copper and Iron, which quickly aid nature in building rich, red corpuscles. When this happens, the appetite improves. Nervousness disappears. Energy and strength usually return. You feel like a new person. Get Pursang from your druggist.

LESSONS NEARLY DONE, BOB? HOW ABOUT THE MOVIES?

SWELL, I CAN DO 'EM IN RECORD TIME NOW WITH THIS DANDY LAMP

THIS NEW I. E. S. BETTER SIGHT LAMP HELPS PREVENT EYESTRAIN

1. Wide opening at the top of the shade throws light to ceiling and eliminates shadows.
2. Glass reflector softens light, prevents glare.
3. Wide shade gives ample light over your work.
4. Shade lining is white to reflect more light.
5. Lamp is high enough to light a large working area.
6. Look for the certification tag.

BUY ONLY A LAMP THAT BEARS THE AUTHORIZED CERTIFICATION TAG

HOMework GETS DONE FASTER AND BETTER WITH AN I. E. S. BETTER SIGHT LAMP

IS your child reluctant to do his homework? If he is, the fault may be with the lighting under which he works. For poor lighting makes his homework unnecessarily difficult. It increases eyestrain and fatigue, which eventually may result in defective vision.

Why not get him this new I. E. S. Better Sight Lamp that is kind to the eyes? It's scientifically designed for better seeing. A special glass reflector within the shade diffuses the light, removes glare, and throws a generous amount of light to the ceiling for general illumination. Costs only a cent or two an evening for electricity. See this new lamp—as well as other attractive styles of I. E. S. Better Sight Lamps—at our display room.
