

JUST

Only That
Candidate—What did you think of my speech on sound economics?
Listener—Well, there was enough sound.

An attorney pleading the case of a young woman in court, stated that she had been jilted three times in two years. The experience naturally unmanned her.

If He Could
Harry—What would you think of a man who would constantly deceive his wife?
Jim—I'd think he was a wonder.

RIBBING

John—Some say Eve was made from a "rib."

Jack—Well, from the way she takes to bridge I should say it was a gambling joint.

That's It

Little Herbert—Paw, what's an advertisement?

Pa—An advertisement, my boy, is almost any picture of a pretty girl (or girls) eating, cooking, smelling, smoking, wearing or driving something the advertisers are anxious to sell.

Pull the Trigger on Lazy Bowels, with Ease for Stomach, too

When constipation brings on acid indigestion, stomach upset, bloating, dizzy spells, gas, coated tongue, sour taste and bad breath, your stomach is probably "crying the blues" because your bowels don't move. It calls for Laxative-Senna to pull the trigger on those lazy bowels, combined with Syrup Pepsin for perfect ease to your stomach in taking. For years, many Doctors have given pepsin preparations in their prescriptions to make medicine more agreeable to a touchy stomach. So be sure your laxative contains Syrup Pepsin. Insist on Dr. Caldwell's Laxative-Senna combined with Syrup Pepsin. See how wonderfully the Laxative-Senna wakes up lazy nerves and muscles in your intestines to bring welcome relief from constipation. And the good old Syrup Pepsin makes this laxative so comfortable and easy on your stomach. Even finicky children love the taste of this pleasant family laxative. Buy Dr. Caldwell's Laxative-Senna at your druggist today. Try one laxative combined with Syrup Pepsin for ease to your stomach, too.

Benefit From Trouble

But for some trouble and sorrow, we should never know half the good there is about us.—Dickens.

TWO DROP THAT

sniffly watery misery of your head cold

Just two drops Penetro Nose Drops in each nostril as directed helps give that cold the air as cold clogged nasal breathing passages open up—and air rushes in its healing aid. 25c buys long lasting supply. Demand the genuine, economical

The Washington MERRY-GO-ROUND

DREW PEARSON & ROBERT ALLEN

Washington, D. C.

BRITISH DIPLOMACY

The British barring of Russian Ambassador Litvinoff from an airplane en route to the U.S.A. has increased Washington whispers that it is about time the British did something to clean up their moribund diplomatic service and cut out snubs to people who are trying to help them.

It has long been the belief of Americans, too polite to mention it, that the British embassy in Washington can make more mistakes to the square inch even than Mr. Hull's state department—and many of the state department's mistakes come from trying so ardently to ape the British.

For years the British embassy has sat on its hilltop, well removed from the bustle of Washington, and looked with slightly disdainful amusement upon the hoi polloi of congress. An invitation to the British embassy in those good old days was considered by the dowagers as better than an invitation to the White House.

But those good old days, unfortunately both for the dowagers and the embassy, are gone, never to return. However, the embassy appears completely unaware of that fact. And its charming young men go their charming way, saying sometimes too audibly: "We must be nice to Americans"; while the real work of defending Britain takes place in the British Purchasing commission, largely under the direction of hard-boiled Canadians and Australians.

Viscount Halifax is one of the most delightful and genteel persons ever to grace the embassy. He tries hard. But hard as he tries, he cannot overcome the bubbling Charles Peake, who minces around him as if his lordship still were viceroy of India with white and crimson-costumed Sikhs mounted on black chargers outside his palace, in Calcutta, instead of being in a city where politics are very earthy and where the congressman's wife from Keokuk has a lot more influence than the pink tea protocol experts usually seen at the British embassy.

WASHINGTON SOCIETY

Washington is a city where debate may rage furiously on the floor of the senate, but simmer down to friendly story-telling in the ante-room or around the dinner table afterward. This is not always the case, however, and sometimes Washington society becomes so aroused that it is dangerous to invite certain strong-minded people to dinner.

This was true during the fight over Roosevelt's Supreme court bill; and during the Roosevelt-Willkie election campaign; and it is somewhat true during the neutrality controversies today. Old hands at the game of controversy, however, manage to keep their tempers. For instance, seated near each other at dinner the other night were Sen. Burt Wheeler, than whom there is no more energetic isolationist, and Undersecretary of the Navy Forrestal, just as energetically interventionist.

Wheeler was talking about the recent neutrality debate, telling how Roosevelt forces influenced votes by promising jobs and dishing out patronage. Interrupted Undersecretary Forrestal:

"Senator, did the neutrality fight reach the depths of your fight to pass the Wheeler-Rayburn act?" (The Holding Corporation act.)

"No," shot back Senator Wheeler, "I didn't have the patronage."

The two men continued a good-natured discussion of neutrality, Wheeler maintaining that time would prove that his anti-war stand was right. After the war, he contended, history would reverse the present tide of war sentiment and there would be a revulsion of feeling if not a virtual French revolution.

"And when the guillotine ax begins to fall, senator," said Forrestal as he departed, "will you be my attorney?"

FINNS VS. NAZIS

Intelligence reports from Europe for the first time indicate friction between German and Finnish troops on the eastern fronts. The Finns are sore because the Nazis have been living off the country and have not been at all scrupulous in paying Finnish peasants for pigs, cows and chickens.

On top of this, the Nazis recently ousted Finnish children from an orphanage at Rovaniemi and used it for the general staff. This made the Finns boil with anger.

FARM TOPICS

PREVENT DISEASE IN DAIRY HERD

Good Management, Feeding Will Reduce Losses.

By Dr. GEORGE TAYLOR
(Extension Dairyman, New Jersey College of Agriculture, Rutgers University.)

Dairymen should think more in terms of herd health and disease prevention and less in terms of treatment and cures.

The value of any dairy animal is dependent primarily upon its health. Prevention of disease is far less costly than disease treatment, and good feeding and management practices can go a long way toward reducing annual losses in dairy herds due to disease.

The ration should supply the proper balance of protein, energy, minerals, and vitamins. Water is also needed.

Quality roughage, including hay, pasture and grass silage, is the most essential item of dairy feed. It is a fair source of calcium and practically the sole source of vitamins A and D in the dairy ration. Concentrates which must be fed to satisfy higher levels of production tend to be toxic to a dairy animal. This effect is largely overcome by the feeding of quality hay when pasture is not available. The long list of ailments in dairy cattle which can be avoided by good feeding includes goiter, bloat, impaction and loss of appetite.

Management ranks with feeding in importance in checking disease. Because the spread of disease is more rapid in large herds, the size of the milking unit should be limited to 50 cows or less. Separate quarters should also be provided for growing heifers and baby calves. Separate isolation and maternity quarters are also desirable.

Strict sanitation is a most important part of management. Regular systematic cleaning and disinfecting will aid materially in keeping down the causative organisms associated with disease.

Dairy animals should be allowed ample exercise under conditions where they may benefit from fresh air and exposure to sunshine.

AGRICULTURE IN INDUSTRY

By Florence C. Weed

(This is one of a series of articles showing how farm products are finding an important market in industry.)

Peanuts for Oils

It took the circus to make the peanut into a national food, and it remained for a Negro scientist, Dr. George Washington Carver, to find scores of new uses for the lowly peanut and its shell.

Dr. Carver has developed a peanut milk, shampoo, vinegar, soap, cosmetics, ink powder, rubber and charcoal. Peanuts are used commercially in more than 300 products including shaving lotions, dyes, linoleum, axle grease and wood stains. Every part of the plant may be used to advantage. When properly cured, the peanut vines make edible hay for stock which compares favorably with clover and alfalfa. The shells have been crushed into insulating boards.

Co-operative Marketing associations of the peanut-growing states, have banded together in a National Peanut council which aims to increase the use of peanuts. About 200,000,000 pounds are made into peanut butter annually. Salted peanuts appeared first in 1887.

At the New Orleans region's research laboratory of the U. S. department of agriculture, scientists are working on the processes of extracting peanut oil and its use as a lubricant in the textile industry to replace imported olive and linseed oil. Shelled peanuts contain 40 to 50 per cent oil and this is often substituted for olive oil in food.

Largest Rural Network

What is believed to be the world's largest rural electrification network connects areas in the adjoining states of Wisconsin, Minnesota, and Iowa, according to Rural Electrification News. The generating plant of the Tri-State Power Co-operative—largest yet constructed in the REA program—is located near Genoa, Wis. It is serving 11 farmer-owned distribution co-operatives, and has an installed capacity of 8,000 kilowatts. Two additional turbo-generators, each with a capacity of 5,000 kilowatts, are to be installed. Its 400 miles of transmission lines, distributing electricity at 34,500 volts, branch out in all directions to large areas in the three states.

Portlight by GRANTLAND RICE

AIR service is just as important in football as it is in actual war. It isn't everything, but air control usually means victory. Line play is vitally important. So is a running attack. But an all-around passing attack can be more devastating than anything else, as it also gives the running game a chance.

Frank Leahy, Notre Dame's master-minding mentor, was quite willing to tell you what he knew about a passing attack. After watching Boston College last fall and Notre Dame this fall, my guess would be that Instructor Leahy knows his share.

"In my opinion," Leahy said, "the passing game moves in about this order: First, the passer; second, pass protection; third, receiving. Each detail is important. To keep a passing game working on the winning side you must have a first-class passer—you must give him protection and you must have speed that can get to the pass—and then hold it."

Notre Dame this year had all three essentials—something they were unable to show against Army in the rain and mud. The greatest pass weakness is weather. "The best passers are born—not made—to a large extent," Leahy continued. "They must have a natural aptitude for throwing a football. A coach can improve an average passer—but he can't make him into a Luckman, a Baugh, an O'Brien, an Isbell, a Parker or an Albert."

"Or a Bertelli?" we suggested. Mr. Leahy smiled, wanly, "Or a Bertelli," he added. "Giving the passer protection and catching a ball are easier to teach—and learn. We have developed good receivers in a year. We couldn't develop good passers in that time. Good passers—I mean the better ones—usually started as kids, something like the caddies who later on make most of the leading pros."

"Good protection is just as necessary. You may remember how well Dutch Meyer at T.C.U. surrounded Davey O'Brien with Al-drich and Hale—center and tackle. We use more than two protectors at Notre Dame." There were times in the Navy game when almost the entire Notre Dame line seemed to be on guard around Bertelli who was rarely hurried or rushed, even by Navy's desperate efforts to break through.

Season Oddities

There are always wide football ranges, but 1941 was fairly close to the all-time record. For example, the first five opposing teams scored 132 points against Pittsburgh this season. These five teams had averaged slightly better than 26 points a game. Then suddenly Fordham couldn't score against Pittsburgh. This was the main shock of this game—more than Fordham's defeat.

Baylor, beaten by Villanova, slaughtered 48 to 0 by Texas A. and M., suddenly turned on a great Texas team, a team that had averaged 34 points a game against teams that looked to be about on Baylor's level—and gives Texas an even fight. Pittsburgh never had a chance to get back on her feet after facing such teams as Michigan, Minnesota, Duke and Ohio State on successive Saturdays.

But the Panther was on all four feet against Fordham, which has developed the mournful knack of jumping off the cliff once a year somewhere along the route. One answer is that certain teams, such as Harvard, start slowly and begin moving up week by week. Others, starting at top speed, begin falling back around mid-season.

Harvard, beaten by Pennsylvania and Cornell in her first two games, was a match for anybody at the end of the season.

From a Coach

Question—Would you like a short tip? You football writers build us up beyond our actual strength, and then a lot of you cut our throats because we lose. A lot of us are not as good as you said we were, even while winning—and not as bad as many think when we are losing. It's the average football writer—not the Old Grads—who gets us into most of our trouble. I think you know that.

Answer—No answer. It's practically 100 per cent true.

THE CHEERFUL CHERUB

We get what we are worthy of. I think I said the other day, But when I look at movie stars I find it hard to feel that way.

Out of Order

It is because things have been put in the wrong order that the present chaos and disaster is upon the world. The order, expressed in four words, has been: Money, things, man, God. The new order will have to be God, man, things, money.—The Bishop of Exeter.

MOROLINE HAIR TONIC

NON-SKID BOTTLE LARGE SIZE 10-25¢

A Good Book

As good almost kill a man as kill a good book.—Milton.

How To Relieve Bronchitis

Creomulsion relieves promptly because it goes right to the seat of the trouble to help loosen and expel germ laden phlegm, and aid nature to soothe and heal raw, tender, inflamed bronchial mucous membranes. Tell your druggist to sell you a bottle of Creomulsion with the understanding you must like the way it quickly allays the cough or you are to have your money back.

CREOMULSION

for Coughs, Chest Colds, Bronchitis

Variety a Pleasure

The variety of all things forms a pleasure.—Euripides.

DON'T LET CONSTIPATION SLOW YOU UP

When bowels are sluggish and you feel irritable, headache and everything you do is an effort, do as millions do—chew FEEN-A-MINT, the modern chewing gum laxative. Simply chew FEEN-A-MINT before you go to bed—sleep without being disturbed—next morning gentle, thorough relief, helping you feel swell again, full of your normal pep. Try FEEN-A-MINT. Tastes good, is handy and economical. A generous family supply costs only

FEEN-A-MINT 10¢

WNU-7 50-41

Need of Patience

Patience is a necessary ingredient of genius.—Disraeli.

THE TRUTH SIMPLY TOLD

Today's popularity of Doan's Pills, after many years of world-wide use, surely must be accepted as evidence of satisfactory use. And favorable public opinion supports the opinion of the able physicians who test the value of Doan's under exacting laboratory conditions. These physicians, too, approve every word of advertising you read, the objective of which is only to recommend Doan's Pills as a good diuretic treatment for disorder of the kidney function and for relief of the pain and worry it causes. If more people were aware of how the kidneys must constantly remove waste that cannot stay in the blood without injury to health, there would be better understanding of why the whole body suffers when kidneys lag, and a diuretic medication would be more often employed. Burning, scanty or too frequent urination sometimes warn of disturbed kidney function. You may suffer nagging backache, persistent headache, attacks of dizziness, getting up at night, swelling, puffiness under the eyes—feel weak, nervous, all played out. Use Doan's Pills. It is better to rely on a medicine that has won world-wide acclaim than on something less favorably known. Ask your neighbor!

DOAN'S PILLS
