

Household Hints

Salt meat requires longer boiling than fresh. Put it into cold water, quickly bring it to a boil, then let it simmer.

Leftover stock from cooked vegetables contains valuable minerals and vitamins. Save it to use in soups, stews, and sauces.

Always keep perfume in a dark place. Daylight will affect every odor differently, according to its formula. In extreme cases perfume turns bright red as soon as it has been exposed to the sun.

Do You Bake at Home?
If you do, send for a grand cook book—crammed with recipes for all kinds of yeast-raised breads and cakes. It's absolutely free. Just drop a postcard with your name and address to Standard Brands Inc., 691 Washington St., New York City.—Adv.

CORNS GO FAST
Pain goes quick, corns speedily removed when you use this, soothing, cushioning Dr. Scholl's Zino-pads. Try them!

More Raleigh Jingles
Raleigh Cigarettes are again offering liberal prizes in a big jingle contest running in this paper. One hundred and thirty-three prizes will be awarded each week.—Adv.

The Washington MERRY-GO-ROUND

DREW PEABODY & ROBERT ALLEN

Washington, D. C.
NO SOVIET-NAZI PEACE

Those who are on the inside regarding the report which Ambassador William C. Bullitt gave President Roosevelt regarding the Near East say there is only one slight ray of sunshine in it. Bullitt told his chief that there was absolutely no chance of Russia making peace with Germany.

Coming from Bullitt, who served as ambassador to Russia and who spent considerable time there in the early days of the revolution in 1917, this means a lot. Bullitt has been vigorously critical of the Soviet regime in recent years and probably would lean over backwards against any overly optimistic appraisal. However, after his special tour of the Near and Middle East on special assignment from the President, he reported that the Russians were so irate against the Nazis that there would be no surrender or compromise.

Bullitt is not so optimistic about the Russian army, which he thinks may fail badly when the Germans are able to get their airplanes in the air again, which they cannot do in sub-zero weather and with snow on the air fields. Politically, however, Bullitt is convinced that Russia will stand with the United Nations to the last ditch.

Against this, Bullitt goes further than anyone else around the President regarding Allied losses. Not only does he believe that Japan will take India, but he feels that Australia will be lost to the British Empire.

If he is right, this will be the worst blow which the United Nations can suffer, especially inasmuch as American troops are now stationed in Australia and New Zealand.

Not all war observers agree with Bullitt on this latter point. They point out that Australia is chiefly a desert country, and it would take weeks and months for a conquering army to envelop these vast areas.

PATRIOTIC INDIANS

As in the last war, thousands of American Indians again are demonstrating their patriotism.

The desk of John Collier, able chief of the Office of Indian Affairs, is stacked with letters from every tribe in the country, pledging aid and offering to make fresh sacrifices for the war effort. Here are a few examples:

Immediately after the declaration of war, the Crow Indians of Montana voted \$10,000 of tribal funds to President Roosevelt to "use as you see fit." They also voted to place in the President's hands the entire resources of their 2,000,000-acre reservation, including mineral, oil and coal deposits, plus all available manpower for combat service.

The Creeks of Oklahoma have set aside \$400,000 of tribal funds for the purchase of defense bonds. Other tribes voting large sums for the same purpose include the Jicarilla Apaches and Pueblos of New Mexico, the Euchee and Seminole Indians of Oklahoma, and the Navajos.

Not to be outdone, the Colvilles of Washington state, the Cheyennes and Arapahos of the Plains and the Nez Perce Indians have announced they will not press for settlement of tribal claims against the government while the war lasts.

Following the Jap attack there was a big rush among Indian youth at every reservation to enlist, especially at the Sioux reservation in South Dakota. Only three of the 46 North Carolina Cherokees in the army were drafted. The rest volunteered.

The patriotic response of Indians may surprise the average American, but not Collier. He says: "The Indians know more than any of us what freedom means. They knew it in other years when they fought against overwhelming odds to save their lands from the white man."

WE WILL WIN

Due to initial Axis advantage of having great organized military machines, the war will be long, difficult and costly. But if the Allied peoples will stick it out they can't lose. All the major basic economic advantages are on our side. Here are a few:

The Axis powers plus their occupied territories have 29 per cent of the world's coal, 18 per cent of the iron ore, 3 per cent of the oil, 21 per cent of the wheat, 23 per cent of the sugar. Total population under their flags, 474,000,000; of which 168,000,000 are conquered peoples secretly trying to throw off their terroristic yokes.

On the Allied side of the ledger is 67 per cent of the world's coal, 63 per cent of the iron, 78 per cent of the oil, 64 per cent of the wheat, and 51 per cent of the sugar.

FARM TOPICS

HOG PRODUCTION AND FARM PLAN

Plenty of Grain Is Seen as Necessary for Success.

By E. M. Regenbrecht
(Swine Husbandman, Texas A. & M. College.)

Hog production, a basic item in the Food for Victory program, easily can be made successful if properly fitted into a profitable farming plan.

Especially suited as a small enterprise, hog production primarily is dependent for success upon the availability of an abundance of grain feed. Hogs always pay more for corn, barley, or grain sorghums than does the grain market. About four pounds of feed produces a pound of pork, but the feed must be properly balanced. Feeds used to balance the farm grain usually are higher in price than the latter but the quantity is small.

Farmers who keep from one to three sows almost always make a success, Regenbrecht says. Hogs do not do well when run in large groups because sanitation and disease prevention become serious problems with large herds. The principal item of expense in hog production is the grain feed, but if this is grown on the farm, or obtainable locally at reasonable prices, the enterprise easily can be established on a profitable basis.

While a sandy, well-drained soil is the most suitable, hogs can be successfully raised on a heavy black soil, but in such case concrete feeding floors are almost a necessity. Hog pastures are necessary, with small grain for winter, and sudan for summer the best. Native grasses such as bermuda are good for a short time in the spring, but soon get hard and tough, and become of little value. A good pasture will furnish 50 per cent of the needed protein and otherwise reduce the cost of production.

Suitable equipment—a movable hog house, a few troughs and a self-feeder—can be built at small cost. A concrete wallow can be classed as almost a necessity. If hogs are kept comfortable they make rapid and economical gains and losses from overeating are avoided. It is likewise true that hogs which do not have a dry, warm place in which to bed during the winter will not make as much profit as those properly sheltered.

Save Money by Making Own 'Homemade' Soap

With the fats and oil situation giving this country considerable worry, rural families with cooking fats available can save by making homemade soap.

Enameled or granite ware is suitable for small batches of soap, but for larger batches an iron kettle is recommended. A large granite or wooden spoon is best for stirring. The four ingredients of soap are lye, water, fat and perfume. Lye should be pure and uniform, and if possible soft water should be used since it will improve the quality of soap.

Fat used should be clean and light-colored and it should be clarified if it accumulates. Clean tin cans, well covered, are best for storing the fat until a sufficient amount has been collected for soap making. Both fats and oils must be washed free from salt. Rancid greases may be purified by boiling with a solution of one part of vinegar and five parts of water.

Scents such as oil of citronella, bergamot, oil of lavender, geranium or sassafras may be added to perfume the soap. This will help destroy the odor of the fat.

Killing Cattle Lice

A dairy herd infested with lice causing severe cow discomfort cannot provide top milk production. Powdered sabadilla dusted on the infested parts is a popular louse killer. It may be used alone or mixed with equal quantities of powdered tobacco and flowers of sulphur. Work the powder well into the hide during dusting. Blanket the animal for a few hours after treatment and thoroughly brush the skin, preferably out of doors.

It is well to repeat this treatment in 15 days in order to get lice that hatch from the nits. Use care when applying the sabadilla powder not to get it up the nose and mouth. A handkerchief or doubled cheesecloth placed over the nose and mouth will prevent irritation.

Sportlight

of GRANTLAND RICE

HORNSBY'S entry into baseball's Hall of Fame brings up once more an ancient argument. Who have been the greater hitters—the right-handers or those who swing from the left side?

The left-handed swingers offer you Ty Cobb, Babe Ruth, George Sisler, Lou Gehrig, Joe Jackson, Tris Speaker and Ted Williams for a starting lineup. This is quite a collection of talent to move against. The right-handers counter with Rogers Hornsby, Hans Wagner, Napoleon Lajoie, Ed Delahanty, Harry Heilmann and Joe DiMaggio—a pretty fair crop also.

The left-hander, being closer to first base, has more than a full stride's advantage. I'd say the left-handed hitting side had a slight edge, but nothing to rave about. For Hornsby, Wagner, Lajoie, Delahanty and DiMaggio could also lean against the leather.

Don't forget that Hornsby averaged above .400 for four consecutive years, taking in his average for that time, which is something.

An Odd Turn

Baseball happens to be the one game in which the left-handed hitter takes a high place in any all-time ranking.

In golf, no left-hander has ever won a big championship. No left-hander has ever won the U. S. Open or British Open, the U. S. Amateur

ROGERS HORNSBY

or the British Amateur crown. In fact, no left-hander has even come close to any major golf event.

There have been good left-handed golfers. But no great ones—no Jones, Vardon, Hagen, Hogan or Nelson. The portside entries can play in the low 70s, they can break 70 here and there, but they are lost in major events.

In golf there are no such left-handed stars as Cobb, Ruth, Jackson, Speaker and many others. Just why this is no scientist seems to know. If so many people can handle a baseball bat so effectively as left-handers, why not golfers?

In Other Sports

The same is true in tennis. There have been good left-handed tennis players, but few champions. Norman Brookes was one. The Australian was a star. R. L. Murray was another.

But the crushing preponderance is all on the other side—Bill Tilden, Bill Johnston, Rene Lacoste, Ellsworth Vines, Don Budge, Maurice McLoughlin, Bill Larned, Fred Perry, Anthony Wilding, Norris Williams, on through the present generation. The star right-handers in tennis outnumber the present generation. The star right-handers in tennis outnumber the star left-handers by ten to one.

The same is true in polo. All great polo players have been right-handed swingers—Devereux Milburn, Tommy Hitchcock, Cecil Smith, Luis Lacey. I can't recall any left-handed polo players. Maybe there are none.

In games where you pick up some form of a bat to hit the ball, baseball is the only sport that can show you a line of top-notch left-handed swingers.

There have been great left-handed pitchers—Waddell, Grove, Ruth, Pennington, Gomez, Plank. And football has known fine left-footed kickers and fine left-handed passers. But outside of baseball the left-handed hitter is far below the average of his right-handed rival.

We'll still let the scientists figure this out.

FOR WOMEN ONLY!
If you suffer from monthly cramps, headache, backache, nervousness and distress of "irregularities"—caused by functional monthly disturbances—try Lydia Pinkham's Vegetable Compound—famous for relieving pain and nervous feelings of women's "difficult days."
Taken regularly—Lydia Pinkham's Compound helps build up resistance against such annoying symptoms. Follow label directions. WORTH TRYING!

That Nagging Backache
May Warn of Disordered Kidney Action
Modern life with its hurry and worry, irregular habits, improper eating and drinking—its risk of exposure and infection—throws heavy strain on the work of the kidneys. They are apt to become over-taxed and fail to filter excess acid and other impurities from the life-giving blood.
You may suffer nagging backache, headache, dizziness, getting up nights, leg pains, swelling—feel constantly tired, nervous, all worn out. Other signs of kidney or bladder disorder are sometimes burning, scanty or too frequent urination.
Try Doan's Pills. Doan's help the kidneys to pass off harmful excess body waste. They have had more than half a century of public approval. Are recommended by grateful users everywhere. Ask your neighbor!
