## Timely Farm Questions

Question: — What is the outlook for the pullet crop in North Carolina?

Answer: — C. F. Parrish, Extension poultryman, says indications are that 20 to 25 percent more pullets will go into the laying house this year than last. Farmers will remember, too, that the number last year was well above the 1940 figure. Two factors have been responsible for this: a desire on the part of the farmer to help out in the war effort by supplying more eggs and higher prices for the eggs. Another factor is a shift from broiler production to egg production.

Question: — Where may I find free information on drying fruits and vegetables?

Answer: — The Extension Service of State College has just reprinted Extension Circular No. 232, "The Home Drying of Fruits and Vegetables". A free copy may be secured by writing to the Agricultural Editor, State College, Raleigh.
