Purina Proof Of Long Life- TOP PRODUCTION

The records of 23 old cows at the Purina Research Farm show how long life and heavy milk production can be combined on the Purina Dairy Program. Each cow is a grade. Each has been handled under average farm conditions. Yet each has given over 100,000 pounds of milk... an average of about 1/2 can of milk a day through 7 to 11 milking periods.

What better proof of the job the Purina Dairy Plan can do. See us for full details!
