NOTICE OF SERVICE OF SUMMONS BY PUBLICATION IN THE SUPERIOR COURT NORTH CAROLINA, CHEROKEE COUNTY.

LILLIE B. STAFFORD VS. WILL STAFFORD

THE DEFENDANT, WILL STAFFORD, will take notice that an action entitled as above has been commenced in the Superior Court of Cherokee County, North Carolina, for the purpose of obtaining an absolute divorce on the grounds of two years' separation.

Said defendant will further take notice that he is required to appear at the Office of the Clerk of the Superior Court of Cherokee County, North Carolina, at the Court House in Murphy, North Carolina, within twenty-seven (27) days after the 7th day of May, 1953 and answer or demur to the Complaint in said action, or the plaintiff will apply to the Court for the relief demanded in said complaint. This 13th day of April, 1953.

J. L. HALL, CLERK SUPERIOR COURT, CHEROKEE COUNTY, NORTH CAROLINA 40-4tc

Greater declines in prices of cattle than in milk and butterfat have improved the price position of dairy products compared with beef animals over the past year.

Murphy Milkshed Artificial Breeders Assn., Inc. announced today that their organization has inseminated a total 586 cows in 1953 as compared to 501 in 1951.

Murphy Milkshed Artificial Breeders Assn. buys semen from the American Breeders Service stud at Asheville, North Carolina which has boosted its record of cows bred from 97,210 in '51 to 103,895 in '52.

Murphy Milkshed Artificial Breeders Assn. is one of 272 cooperatives and private breeding organizations in 28 states that has contributed to the 623,628 first service cows bred by the American Breeders Service.

The American Breeders Service is the foremost supplier in the nation of semen from high index proved dairy sires, rated in the top 2% of all bulls proved in the United States in Dairy Herd Improvement work.

Murphy Milkshed Artificial Breeders Assn. said service from these great bulls is available to every dairyman, large or small, at the regular insemination charge, as the small farmer rarely can pay the expense of keeping a good proved bull.

Its manager and directors are making every effort to promote the use of service to these ABS Proved Sires, as they feel that one of the main purposes of artificial breeding is the use of the best proved sires obtainable, at a cost that a dairy farmer can afford.

North Carolina beet production this year is expected to be about 10 per cent lower than in 1952.
