America's lowest priced low-friction SIX!

FORD'S NEW I-BLOCK SIX IS THE MOST MODERN SIX IN THE INDUSTRY... THE ONLY LOW-FRICTION SIX IN ITS FIELD!

Why are more and more folks who like sixes swinging to Ford's 115-h.p. I-block Six? Because they're getting the most modern six in the industry... and for less money than practically any other six in America. Ford's short-stroke, low-friction design means less gas waste, less wear and longer engine life. The extra-deep, "I-shaped" block means a more rigid, quieter engine. And the new high-turbulence combustion chambers, teamed with Ford's exclusive Automatic Power Pilot, bring you even more "GO" per gallon.

ONLY FORD OFFERS BOTH A V-8 AND SIX IN THE LOW-PRICE FIELD!

Ford is still the only low-priced car to bring you V-8 power. And this year, Ford's Y-block V-8, with its new deep-block, low-friction design, is the most modern

"eight" in the industry. Both new Ford engines are available with Fordomatic, Overdrive or Conventional Drive—the finest choice of drives in the low-price field. *at extra cost

HERE'S WHAT FORD'S LOW-FRICTION DESIGN MEANS TO YOU

LONGER ENGINE LIFE. Both new Ford engines are of short-stroke design. This means pistons travel less distance. Naturally, there is less friction and less wear. In both engines overhead valves have a free-turning feature which allows them to rotate to cut down wear.

MORE POWER. Because there is less friction to overcome in moving pistons up and down, there is more energy available to move the car. And because combustion chambers are wedge-shaped, fuel burns more completely... for even more power and less gas waste.

MORE "GO" PER GALLON. In addition to this gas-saving, low-friction design, Ford engines bring you the Automatic Power Pilot which squeezes the last ounce of power out of every drop of gas. You won't find any of the modern advances on this page in any other low-priced car.

Worth more when you buy it... worth more when you sell it!
