WE'RE PUTTING IT "RIGHT ON THE BARRELHEAD"...

IT TAKES FAITH in the future to put this kind of "cash on the barrelhead" so that the Southern can keep pace with the fast-growing industrial South.

For many millions of dollars are involved when we buy locomotives and cars... build or modernize yards and other facilities. Conditions must be anticipated for years ahead... large commitments must be made far in advance. Then—somehow—the money must be found to meet these obligations.

Since 1945, the Southern Railway System has spent more than \$327 million for major improvements. Some of this money came out of earnings. The rest we borrowed. But earned or borrowed, every dollar we committed ourselves to spend represented our faith in the future of the South we serve.

With this same faith—and without being subsidized by tax dollars as are other transportation agencies—we are continuing to build today for the still brighter "tomorrow" that surely lies ahead for the Southland.
