this laboratory plays football

Skip Collins looks ready for anything. Is he ready for polio?

Last spring he received a vaccine designed to protect him from infantile paralysis. Some time this year, after studying records on Skip and nearly two million other youngsters, scientists will know if the vaccine works. Skip's a football-playing laboratory, helping them out.

Your March of Dimes contributions not only make the vaccine trials possible, they also give a chance for a better life to thousands who have polio.

THE NEW YEAR

BY NORA COBB SPENCER

We hail thee, thou faithful New Year,

Full of the promise of gladness and cheer.

With rain to quench the thirsty earth

And shows to afford happy children mirth—

With trees and shrubs dressed in icy shrouds

As the melting sun's rays peep behind clouds.

With many spring mornings to quicken the step

As the sun peeps o'er the mountain's crest.

With dancing, hurrying April showers

That awaken the responsive buds and flowers.

With the deep blue twilights in summertime.

When the whipporwill calls in rhythmic rhyme.

With the corn leaping up like a living thing

While the crows caw lustily as they take wing.

With autumn playing her noble part.

As she paints the forests in skillful art—

With colors that arouse a feeling sublime.

And hearts are grateful for His touch Divine.

Then comes Christmas hastening along

With the rush, the smile, the Carolers' song—

With Santa Claus taking his part in the scene.

With his gifts and toys about which children dream.

Good Old Year, you have enacted well your part!

We greet the New Year with triumphant heart!
