

GRAHAM

Burley Acreage Be Measured

Within a short time reporters working under the direction of the local ASC County Committee will be visiting farms throughout the County checking acreage planted to Burley tobacco.

After the measurements are made, farmers are officially notified by the ASC county office of the measured acreage of Burley tobacco.

Ronald R. Orr, chairman of the Graham County ASC Committee, says that when these notices are mailed out there are always some farmers who are not satisfied in their own minds that the measured acreage is actually correct.

To satisfy his own mind, any farmer who thinks his acreage has been incorrectly determined may, within 10 days after the date of the notice of measured acreage, request remeasurement.

Any farmer making a request for remeasurement must deposit with the ASC county office the estimated cost of remeasuring his acreage.

Orr calls special attention to this 10 day deadline. He cautions that the request must be made within this period for the remeasurement to be made.

Orr further explains that farmers who exceed their allotted acreage when planting an allotment crop may notify the ASC county office that they wish to dispose of excess acreage in order to be in compliance, avoid penalty, and be eligible for price support.

Orr says that in this case, too, the report of their intention to dispose of the excess must be made within 10 days of the date of the notice of planted acreage. At the time the farmer makes his report of intended disposition, he must de-

Named Most Outstanding

MISS SARA ALICE BORING

Miss Sara Alice Boring, daughter of Mr. and Mrs. Paul Boring of Canton, Ga., and granddaughter of Mr. and Mrs. R. A. Dewar of Andrews recently received high recognition on her graduation from high school in Canton. She was chosen the most outstanding girl in the senior class and most outstanding student in Canton High. Lockheed Aircraft Corp. presented a set of books to the Canton High School Library in her honor. She has received a scholarship to Emory-at-Oxford where she will enter college in the fall.

posit with the ASC county committee the estimated cost of checking the disposition of the excess acreage.

Orr warns all farmers in the county that 10 days is plenty of time in which to request remeasurement or to request disposition. However, he says this does not permit time for procrastination.

GARDENTIME

BY ROBERT SCHMIDT

Weeds are probably the No. 1 problem in vegetable gardens during the summer season.

They choke out small crop plants and compete with crops for plant food and moisture in the soil. The old control method of cultivator, sweep, and hoe is still a good one but it means a lot of hard work,

and the modern gardener is looking for an easier way out. Everyone is looking for a chemical that can be sprayed on the garden and which will kill all the weeds and grass without harming the vegetables. That is a big order. The difficulty lies in the fact that we grow so many different kinds of vegetables and they belong to so many different botanical species and families, some of which are closely related to our common weeds, that the chemicals used to control the weeds will also kill the vegetable crops.

In recent years a material known as 2, 4-D has been used extensively to kill weeds in corn, gladiolus, and in lawns. Used at the proper strength, 2, 4-D has not caused injury to these crop plants and an effectively controlled weeds and wild onions. However, the spray of 2, 4-D will drift in the wind and cause damage to other crops such as shrubbery and grapevines. Sprayer used for 2, 4-D should not be used to spray other plants.

Most vegetables and other garden crops are susceptible to severe damage by the usual herbicides. The chemical companies have been busy experimenting with new materials. The latest developments are the pre-emergence sprays. These pre-emergence weed killers do not act like other herbicides. In fact they have no effect on well-established weeds or crop plants. However, they are very effective against weeds or plants that are just germinating or are just emerging from the soil. Pre-emergence sprays are best applied to freshly cultivated soil. One application will usually keep the soil free from weeds for from three to five weeks. Then the cultivation

Adventists Attend Annual Conference

Pastor C. D. Wellman and several members from the Murphy Seventh-day Adventists church are attending the 10-day annual convention of the church at Collegedale, Tenn., near Chattanooga. Up to 2500 Adventists from eastern Tennessee and the State of Georgia are in attendance.

Wellman stated that, "Adventists have been holding these annual conventions for more than 50 years."

Members of the Murphy church will report on the activities of the convention at services to be held in the local church on June 18.

and spray application must be repeated. Well-developed crop plants are not harmed by these sprays, but neither are well-developed weeds.

THE NO. 1 FARM SAW

THE New MODEL 17

HOMELITE
One Man Chain Saw

No other saw can match it for all purpose cutting on a farm. Only 22 pounds... easy to operate. And 3.5 actual dynamometer rated brake horsepower... much more power and dependability than any other saw its size. Ask for free demonstration.

Six Andrews Boys Join Navy

The U. S. Navy Recruiting Branch Station at Franklin has announced that the following named men from Andrews were enlisted in the Navy, during the first week of June and are now undergoing Recruit Training at the Naval Recruit Training Center, Great Lakes, Illinois.

George William Morgan, Hugh Frank Forbes, Jr., Lannon Postell, Arlin Day, Dale Bruce Raxter and Gene Autry Gibby.

Vacation time is here. Time to hit the open road. Hit the road, but don't hit anything else. Don't be a "Hurry Bug" in the heavy summer traffic. Slow Down and Live

IN MEMORIAM
In memory of our dear mother, Mrs. Hattie Voyles Mintz. It was just one year ago When dear mother went away. Oh! how we miss dear mother since she went away. If only we could bring dear mother back to stay We would be so happy For there are many sweet things we would like to say. Sweet and kind were dear mother's ways. There are many words But mother is the sweetest word I could ever say. And I know mother will be waiting for me when I go away So our thoughts are of mother dear today. Mother is not dead, she is just away. 48-1tp The Boys and Dad

CUT THE COST
of Growing Cage Layers
Feed **PURINA GROWENA**
Bite-Size CHECKERS

Tests at the Purina Farm prove that there is less feed waste when Bite-Size Checkers are fed instead of mash. This may cut several cents off the cost of growing a pullet. Please visit us... and make it soon!

TWO WAYS TO KILL FLIES LIKE MAGIC

1. Sprinkle Purina Fly Bait around cages and growing pens. It draws flies like mo-lasses... kills 'em like magic.
2. Spray Purina Cage Droppings Spray on droppings to kill maggots! An excellent, economical fly control plan.

Be sure your '55 V-8 has all these advances

When it comes to ordering a V-8, it stands to reason you want a proven V-8. And both Ford's 162-h.p. and 182-h.p. Y-block V-8's are just that... backed by Ford's 23-year experience building more V-8's than all other makers combined.

Unlike other V-8's on the road, Ford brings you Trigger-Torque power... power that can obey four times faster than you can wink! And only Ford has the years-ahead look of the Thunderbird... the smoother riding of Angle-Poised Ride... the gas savings of the Automatic Power Pilot. Why not come in for your Test Drive today?

Extra-deep, Y-shaped block

Ford's deep-block construction provides a more rigid support for the crankshaft to help the engine run smoother... last longer. Only Ford in its field uses this construction.

Short-stroke, low-friction design

With Ford's modern, short-stroke design, pistons travel a shorter distance for a given amount of car travel. This results in less friction, more available power from gas, longer engine life.

Highest torque in the low-price field

Torque is the twisting force that turns the rear wheels of your car. The greater the torque, the faster your engine responds to your commands. And the torque in Ford V-8 engines is the highest in its field.

Automatic Power Pilot

Exclusive to Ford engines, this completely integrated carburetion-ignition-combustion system works automatically to assure that the right gas mixture is ignited at the right instant and burned completely, to give you the most "Go."

Turbo-Wedge Combustion Chambers

The wedge shape of Ford combustion chambers causes faster, more complete combustion and more efficient conversion of gas into usable power.

Full-Flow Oil Filter

Unlike filters used in other low-priced cars, Ford's oil filter cleans all of the oil in your engine all of the time... for greater protection of vital parts.

18mm. Spark Plugs

These totally new plugs, exclusive with Ford in the low-price field, have an extra-wide gap between plug core and shell, which makes them resistant to formation of deposits up to three times longer.

See your local FORD DEALER... Try Trigger-Torque and you'll buy Trigger-Torque
