

Savings Bonds Still Increasing

Sales of U. S. Savings Bonds in North Carolina continued to soar with purchases in June being 18% greater than last year.

This sets a new ten-year sales record for the month. For the first six months of this year, a new all-time peace record was set with sales amounting to \$28,907,934.00, 21% greater than 1954.

This amount to nearly 50% of the annual state quota of 58.8 million dollars.

This report, released today by W. D. Whitaker, Cherokee County Chairman, shows that Cherokee County sales for June were \$6,843,75. Neighboring counties also show increased sales.

Over 1,000 Fat Man's Misery Picnics were served during the first week of "Wilderness Road" at Berea, Ky.

Freezer Facts

Today's homemaker is a smart food buyer. One of her favorite tricks is taking advantage of "specials" in meats at the supermarket, buying extra cuts and storing them in her home freezer to stretch her food dollars.

But she also knows proper freezing must follow her trip to the store—if her thrift-wise shopping is really to pay off. Thus she keeps in mind three important points about freezing meats at home:

1. Choose high quality meats. Since freezing does not improve the flavor of any food, the frozen product will be no better than the food in its original state.

2. Package meats properly. Choose a wrapping material which keeps air out. When air is allowed to reach food during freezer storage, the result is loss of moisture, accompanied by a change in flavor. The food soon becomes unpalatable. The condition known as "freezer burn" occurs when air enters the package.

One of the best freezer wrapping materials on the market is the new plastic wrap made of saran. Because this transparent film clings to the shape of any food being wrapped, it is possible to mold the film closely even to irregular cuts of meat, such as roasts, squeezing out a maximum amount of air from the package.

Follow this simple method: First, pad any bony edges with an extra piece of saran; then overwrap with a single thickness of the film using the "drug store wrap" method; pull saran tightly around meat to get the closest possible seal before applying freezer tape; tape and label. Masking tape which may be written on is good and makes labeling easy.

3. Label foods accurately. Label each package with date, name of product, and approximate number of servings. It is helpful to add an "expiration date" to the label—the maximum storage time. Most freezer manuals will have storage time charts. Check freezer occasionally to use up those foods stored longest. Use all foods before expiration date.

Careful attention to good freezer techniques and proper packaging will insure a high quality frozen food product.

SAFE PARKING

Know how to safely park your car on a hill? The Institute For Safer Living lists three precautions that should be taken to prevent the car from rolling away and causing an accident. First, set your handbrake firmly and be sure that it holds; second, put the car in gear — reverse if heading down, low or "drive" position if heading up; third if at a curb turn your front wheels solidly against it — if on an open road play it safe and block the downhill wheel with a stone.

Young Writers May Enter Poetry Contest

The Poetry Council of North Carolina had added a second cash prize to the Virginia Dare contest for young writers.

The Virginia Dare prize itself is \$10 for first place. A second new prize of \$5 for second place has been added. There is also a book prize for honorable mention.

Anyone under 18 can enter the contest. Send just one copy of a new, unpublished poem of your own, typewritten, and 20 lines or less in length.

Send your name and address on a separate sheet, along with the

poem, to the Poetry Council of North Carolina, P. O. Box 6252, West Asheville, N. C.

Early entry will be appreciated since the registration of entries is a complicated process. The more entries sent in, the better the contest. All young writers are invited to participate.

North Carolina's cucumber growers are expected to produce about 650,000 bushels of cucumbers for fresh market. This is an average yield of 100 bushels per acre on the 6,500 acres for harvest. If realized, it would be the largest cucumber production in the state since 1930.
