the lands of said defendants in Murphy Township, Cherokee County, North Carolina, to-wit:
On the South side of Terrace Avenue in the Town of Murphy.
Being Lots ten (10) and Eleven (11) of Block C of the Blumenthal Addition to the Town of Murphy, Map or plat of which is of record in the office of the Register of Deeds for Cherokee County, North Carolina in plat book one (1), at page 3, reference to which is hereby made for more complete description of said lots.
And being the same lands conveyed by Charlie Davis and wife Miner Davis to Arnold J. Millsaps and wife Myrtis Millsaps, for deed dated September 1946, and

N. C. Milk Cows Are Decreasing

Estimated numbers of June milk cows on North Carolina farms have been on the decline for the past two years. The numbers as reported for 1953, 1954 and 1955 were 381,000; 378,000; and 366,000, respectively.
Several factors serve to explain this decline in reported milk cow numbers. The build-up to 381,000 head in June of 1953 was to the second highest number on records going back to 1935, being exceeded only by the 389,000 reported for June of 1944. Two successive dry years, 1953 and 1954, necessitated greater purchases of high priced feeds, and encouraged dairy farmers to cull their herds very closely. Finally, these selective cullings and other good dairy management practices have demonstrated to farmers the practicality of producing more milk from fewer milk cow numbers.

GARDEN TIME

BY ROBERT SCHMIDT
In the vegetable garden now is the time to practice sanitation, a thorough clean up of all plants which have matured their crops and are through for the season — for example: beans, melons, cucumbers, summer squash and others. If these old plants are allowed to remain they will carry over many insect pests and diseases into next season. They may be plowed under or composted with a little manure and soil. This will take care of the pests and at the same time supply much-needed organic matter for the garden. Just because plants are through producing for the season it is a mistake to let them remain to become a breeding place for insects and diseases which will give you trouble next year. In eastern and central North Carolina there is still time to plant such crops as turnips, mustard, spinach, chinese cabbage, cabbage (plants) collard (plants), broccoli (plants), beets, snap beans Kohlrabi, kale shallots onions sets, leaf lettuce and radishes. In the flower garden this is a good time to plant seed of spring

recorded in the Office of Register in Book 166, at page 192 therefore to which is likewise made for more complete description of said lots.
Said lands being fully described in the complaint now on file in this action, reference to which is hereby made for more full description.
And for the further purpose of condemning the said land to sale to satisfy said taxes, tax liens, interest and costs of this action, and to forever bar and foreclose all right, title, estate, interest, claim, and lien of defendants in and to or upon said lands; and the said defendants will further take notice they are required to be and appear before the Clerk of the Superior Court of Cherokee County, North Carolina, at his office in the Court house in Murphy, N. C., within twenty (20) days after the 8 day of September, 1955, to-wit, on or before the 28 day of September, 1955, and answer or defend to the complaint in this action, which is now on file with copies for defendants, or the plaintiff will apply to the court for the relief demanded in the complaint.
This the 2 day of August, 1955.
K. W. Radford
Clerk of the Superior Court of Cherokee County, N. C. 4-tc

and early summer blooming perennials. If these seeds are planted now in flats, coldframes or well-prepared seed beds, and transplanted as soon as they are large enough to handle, they will bloom next year. If you plant the seeds in the spring most on these plants will not bloom until the following year.

Also, August and September is a good time to plant seed of pansies and the winter annuals such as annual larkspur, annual phlox, Shirley poppies and cornflower. Pansies should be transplanted but the others may be left as seeded. They are all hardy to winter temperatures. All of these are early spring bloomers.

OH HAIL!
Tibetans abominate hail as the mischief of devils and believe that it must not strike the holy buildings of Lhasa, long the city of the Dalai Lamas. The government hires magicians to prevent such disaster and punishes them if they fail, the National Geographic Society reports.

WILD MAMMALS
More than 50 different mammals, including bear, cougar, and the largest remaining herds of Roosevelt elk, inhabit the primitive wilderness of Washington State's Olympic Peninsula, says the National Geographic Society.
