## Tips Offered State Fair Entrants

If you're planning to enter some of your handwork in the State Fair this year, then you'll be interested in these tips offered by Julia McIver, State College extension clothing specialist.

There is a wide variety of tricks that can give your clothes that special mark of distinction, says Miss McIver. But actually there's no special magic about making a very finished looking dress. All you need are a few helpful pointers.

One of the most important steps to learn in dressmaking, says Miss McIver, is to learn how to sew with the grain of the material. Grain is the way in which a fabric has been woven—lengthwise—(wrap) and crosswise (fill) threads of yarns are woven together at right angles to make the material. Pieces must be cut on the correct grain, and the grain must be kept in its correct position throughout construction if the garment is to be grain perfect, explains Miss McIver.

Maybe you're wondering why it's so important to have a grain-perfect garment. Because the finished garment will not fit well, hang correctly, or look smart unless cut and sewn on the proper grain, explains Miss McIver. Unfortunately, there is no secret formula you can employ to compensate for or conceal a badly cut garment. Prevention is the only cure, so make your clothes grain perfect.

## ASC Review Changes In Tobacco Program

H. D. Godfrey, state administrative officer for Agricultural Stabilization and Conservation, today reminded Tar Heel tobacco growers that there have been several recent changes made in the tobacco allotment and quota program.

Public Law 21, passed by the Congress this year, made several changes in the method of operation of the adjustment program on tobacco for this year and next. One of the most welcome of these changes, Godfrey said, is the one that eliminates credit for overplanting. In previous years, under the Law, it was possible for a farmer to increase his planting history and consequently his tobacco allotment by consistent overplanting and payment of penalty. Public Law 21, he said, eliminates any credit for overplanting for this and future years.

The increased rate of penalty was cited as another major change. Last year, Godfrey said, the penalty for overplanting Flue-cured tobacco was 21 cents a pound. For this year, that rate has been increased to 40 cents a pound. The 21 cents represented 40 per cent of

## Ten Word INTELLIGRAM

- Check the correct word:
- Deaths in the east coast floods topped (200) (750).
  - Deaths in North African riotings topped (200) (750).
  - East coast floods followed in the wake of hurricane (Diane) (Connie).
  - Princess Margaret is (25) (32) years of age.
  - United Mine Workers recently received a \$2 per (day) (week) raise.
  - Russia is releasing (33) (3) more American prisoners.
  - "Ham" is slang for an amateur (farmer) (radio operator).
  - Cantaloupe (is) (is not) a member of the gourd family.
  - (Pittsburgh) (St. Louis) trails in the National League.
  - The (tiger) (lion) symbolizes Great Britain.
- Count 10 for each correct choice. A score of 0-20 is poor; 30-60, average; 70-80, superior, and 90-100, very superior.

Decoded Intelligram

1-200, 2-750, 3-Diane, 4-25, 5-Day, 6-3, 7-Radio operator, 8-Pittsburgh, 9-St. Louis, 10-Lion.

the previous year's sale price; the 40 cents represents 75 per cent of the previous year's sale price.

## GARDEN TIME

BY ROBERT SCHMIDT

In addition, farmers who fail to direct ASC reporters to all of the tobacco they have planted, or farmers who file false reports regarding production and disposition of their tobacco, will have their present allotment reduced.

Next year, allotments and measurements will be in hundredths of an acre in an effort to crack down on farmers who do not cooperate with their neighbors in their efforts to maintain the price of tobacco through keeping supply in line with demand, Godfrey said.

ASC committeemen or office employees in each of the 100 North Carolina Counties will be glad to answer any questions farmers might have on these changes, he added.

## TEACH THE DEAF

Alexander Graham Bell, inventor of the telephone, persuaded Clarke School for the Deaf at Northampton, Massachusetts, to start the first training course for oral teachers of the deaf in the United States in 1889. Since then, more than 500 have gone from there to every State and 20 foreign countries to teach deaf children to talk.

They have brought comfort to parents, in Argentina, Canada, Australia, Japan, Turkey, India, South Africa and Norway, the National Geographic Society says.

This is the critical period for the strawberry bed. Either the crabgrass is choking the plants out or dry weather is killing them. For that reason many of our home gardeners are resorting to fall planting which I will discuss in a later article. However, the market gardener is concerned with low costs and high production and therefore must continue to practice spring planting and the development of a matted row bed.

You probably have observed that as soon as the spring crop was harvested the old plants began to send out many runners which produced runner plants which caught root in the soil along the row. In the heat of late summer not many runners are produced but in September and October the runner formation is heavy again. However, our scientists have found that runner plants rooted in early summer will produce about twice as many berries as plants rooted in the fall. For that reason you should make an extra effort to save the early runner plants and keep them growing.

During late August in the mountains and during early September in the eastern part of the state is the proper time to apply fertilizer to strawberries. If you have a narrow row the fertilizer can be applied in a shallow furrow on each side of the row. If you have a wide
