THIS truck still pays all its own way!

YES... THIS IS A TRUCK, TOO—but there's a difference. This truck rolls on its own "highway"... pays all its costs of doing business, right down the line. This is a truck for a railroad car! And despite the many changes that have taken place in this nation's dynamic railroad industry in recent years, one fact remains fixed and unchanged. America's self-supporting railroads still have to compete for business with tax-subsidized intercity carriers that, by their own admission, have long since outgrown the infant-industry stage.

This unequal competitive situation hurts all carriers—and our country, too. It can be corrected in the next Congress by legislation that recognizes no favorites and grants no favors. All we ask is simple fair play for all—in the traditional American way.
