**U. S. Savings Bonds are indestructible!**

Everything, they say, comes out in the wash. And this photograph shows how a U. S. Savings Bond left in a man's shirt pocket came out after a session with the wringer. But its value hadn't shrunk a bit. The U. S. Treasury replaced it—as it has nearly a million other Bonds which were mutilated, stolen, lost or destroyed. Savings Bonds have been wrung through wringers, destroyed in fires, chewed up by dogs, goats, cows and probably children. But their owners never lost one penny. The Treasury keeps a record of all Bonds purchased and replaces them without charge in case of mishaps. What's more, the Treasury issues the Bond with

its original date so you don't lose a penny of interest either. U. S. Savings Bonds are not only safer than cash but one of the best investments you can make. Your government guarantees the principal—up to any amount—and the rate of interest you receive. You'll be surprised at how savings accumulate when you invest regularly in Bonds. So start buying Bonds today—either on the Payroll Savings Plan where you work or at your bank. And make your Bond buying a regular habit. It's one that will bring your family greater security.

U. S. Savings Bonds strengthen the security of your family, your community, your country.
