Breakfast Cuts Down On Fatigue

The importance of getting a good breakfast tucked inside you each morning cannot be overemphasized. Health and beauty both depend to a large extent on this first important meal of the day.

Your stomach has been without food for the longest in 24 hours.

People who feel that they can't get breakfast down have a mistaken notion about what breakfast must be. It needn't be bacon and eggs and toast. It needn't be the same thing each morning. In your grandmother's day, it was quite likely to be lambchops, fried potatoes and apple pie. This was considered filling and, indeed it was.

Don't depend on dry cereal day in and day out. Take time to cook cereal now and then. If a bunch of grapes and a softboiled egg appeal to you, have them. But get that breakfast down.
