

Lays Claim To Distinction

It is believed the only Baptist college in the nation with two foreign missionaries on its board of trustees.

This oddity is heightened by reality that a trustee must live in North Carolina to be eligible for board membership. Yet two trustees are listed as missionaries to Africa in 1959.

All perfectly in order, the situation developed this way:

The Rev. Zeb V. Moss, pastor of Carolina Baptist Church and a trustee since Jan. 1, will sail with his family for Northern Rhodesia in Central Africa Sept. 30. He will of necessity resign from the board, but muses, "It's a little too far for me to return for board meetings anyway."

Dr. W. Wyan Washburn, Boiling Springs physician and Gardner-Webb trustee since 1946, returned to his practice July 1 after several months as a medical missionary to Nigeria, West Africa.

During their service at a Southern Baptist mission hospital the Washburns, a doctor and nurse team, treated thousands of patients and later traveled extensively in Africa, the Middle East, and Europe. Since their return they have appeared before numerous church and civic groups to show pictures and tell of their experiences.

A third trustee, Dr. Donald Moore, of Coats, could claim missionary status, having served as a medical missionary in China for several years. He returned to North Carolina after being driven from China by the Communists.

The Rev. Mr. Moss, an Aberdeen native, is a graduate of Gardner-Webb and Wake Forest colleges Southeastern Baptist Seminary. Mrs. Moss is the former Miss Evelyn Krause of Union Mills in Rutherford county. She is a Gardner-Webb and Meredith College graduate.

The Mosses were appointed foreign missionaries June 18 at Ridgecrest Baptist Assembly, having previously volunteered for such duty. They will go into a new territory for an initial stay of four years.

They are featured in a new color motion picture by the Foreign Mission Board, "In The Circle of His Will," which portrays their decision and steps toward becoming foreign missionaries.

Soil Conservation NEWS

SMITH

Noah Hembree of Peachtree has started cutting pulp from his woodland, and is getting out several cords to the acre. The pulp trees be cut have been marked by Mack Howell, and only those trees are being removed which are crowded, crooked, or which are wolf trees. A good stand of timber is being left for a future crop. The remaining trees will grow more rapidly for several years. When they slow down again, it will be time for another thinning. Most timber sites in this area can be thinned profitably on an eight to ten year cycle. This means that every eight to ten years the farmer can harvest a crop from his woodland.

Many Cherokee county farmers are doing an excellent job of managing their forest lands, and these farmers are realizing a profit from their forests. Many other farmers have a potentially valuable crop and are not harvesting it. A farmer raising corn or wheat would not think of leaving his grain in the field long after it is ready to harvest, but many leave their timber for years after it should be thinned. When trees die in the woodland, the farmer is losing money just as surely as he would be if he left his corn in the field over winter and gathered it in May.

Another group of farmers go to the other extreme and practice what Paul Nave calls "Selective Cutting." They select everything that will make a two by four and cut it. This is an extremely wasteful way to manage and harvest timber, unless the land is being cleared for pasture or cultivation. Probably more money has been lost by clear cutting timber land than any other single woodland practice. When this method is followed, a crop of timber can be cut from a particular piece of land only once in thirty five to fifty years. The cash received may be a little more than one cutting would bring in a well managed forest, but the yearly return from such a cutting world be very small.

DEATHS

ELBERT W. NELSON

Elbert W. Nelson, 36, of Chamblee, Ga., died Saturday, August 1 at the Veteran's Hospital in Atlanta. He was a son of Mr. and Mrs. John Nelson of Topton.

Mr. Nelson was a chief petty officer in the navy and was a graduate of Andrews High School.

Surviving are his wife: two daughters, Rosemary and Susan Nelson of the home; his parents, Mr. and Mrs. John Nelson of Topton; two sisters, Mrs. Jess Davis of Knoxville, Tenn., and Mrs. Dayton of Detroit, Mich.; two brothers, Eugene and Earl Nelson of Topton.

Funeral services were conducted at the National Cemetery at Marietta, Ga., with military honors.

RILEY WACHACHA

Riley Wachacha, 43, of Robbinsville, died at 8:20 a.m. Monday in a Cherokee hospital after a long illness.

He is survived by Mrs. Lucinda Axe Wachacha, two daughters, Katherine and Emily, and two sons, J. C. and Abraham all of the home, the father, Garrett Wachacha and a half-sister, Winona Wachacha.

Funeral arrangement will be announced later by the Townson Funeral Home.

FARM QUESTIONS

QUESTION: Does heredity have anything to do with mastitis in dairy cows?

ANSWER: Yes. Recent research shows that heredity plays an important part in determining a cow's resistance to mastitis. Low udders (ones that hang down low) are more susceptible to mastitis than high udders. Mastitis remain the No. 1 disease of dairy cattle. The average North Carolina dairy farmer loses \$300 a year from the disease. New projects in animal breeding offer hope of developing animals highly resistant to the disease.

WKRK To Operate As Closed Corporation

James B. Childress, owner of radio station WKRK, announces that application has been made to the Federal Communications Commission to operate as a corporation.

Mr. Childress stated that this will not in any way change WKRK operation, out will include Paul V. Ridenhour in the ownership of WKRK.

The new corporation will be closed with Mr. Childress as president and major stockholder, Mrs. Childress as secretary-treasurer and Ridenhour as vice-president and retaining his management position. Plans are underway for expansion of the entire facility of WKRK upon the grant by the FCC of a construction permit to increase power to 5000 watts.

Expect higher prices for farm building materials due to the high rate of residential construction.

GARDEN TIME

I have been having trouble with "Actinopeltis" on a very large Southern Red Oak. This is a fungus disease which causes leaf spotting and results in rather severe defoliation. The disease attacks the lower leaves first and gradually works upward. The pathologists tell me that it may be controlled by spraying but special equipment is required to cover a tree so large. They do give a word of encouragement by saying that the disease seems to work in cycles and is more severe during murky weather in late spring and early summer.

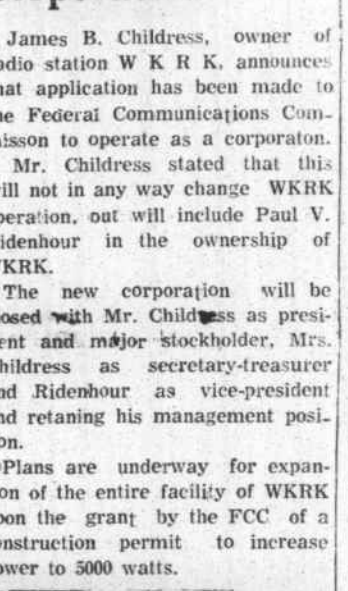

Remember that anything which interferes with the normal functioning of the leaves of a plant will reduce food manufacture and may result in the death if not corrected.

Two cases of camellia canker, or die-back, have just come to my attention. This is the most common disease of camellias. The first symptoms is a wilting of the leaves followed by the formation of cankers on the stems. Terminal twigs may be killed.

To control the disease, cut away and destroy all dying twigs and small branches, cut out the diseased large branches, cut out the diseased portion and apply an antiseptic paint to prevent re-entrance of the fungus and promoted healing of the tissues. This disease is usually more severe on plants that have been heavily fertilized, especially with nitrogen.

Recent investigations suggest that a protective spray of Ferbam may help in control. If you wish to try this, use level tablespoons to five gallons of water plus a good wetting agent. It seems that the best time to apply this protective spray is just before and during the period of leaf fall.

Switzerland Swiss Cheese Gives Breakfast a Lift

WITH VACATIONS OVER and the youngsters due back to school, it's time for every mother to give her family a sound nutritious start to the day with a good breakfast. Borrow a tip from the Swiss and make breakfast eggs doubly delicious with Switzerland Swiss cheese, one of the world's great cheeses. Rich in protein, this classic cheese is also a good source of essential minerals and vitamins and adds incomparable flavor. An excellent food buy, Switzerland Swiss cheese is well worth the few extra pennies it costs. We think you'll agree Alpine Eggs will make any breakfast taste better.

ALPINE EGGS
4 tablespoons light cream
8 eggs
Salt and pepper
Butter
1/2 cup grated Switzerland Swiss cheese

Heat oven to 350° F. Butter custard cups or ramekins. Pour 1 tablespoon light cream in each. Break 2 eggs into each. Sprinkle with salt and pepper; dot with butter. Cover with grated Switzerland Swiss cheese. Bake at 350° for about 15 minutes. Makes 4 servings.

Farm Production Cost Expected To Increase

Feeder pigs are the only thing expected to cost North Carolina farmer less in coming months.

Most of other farm production items are expected to remain steady or creep upwards during the rest of 1959.

These predictions were made by Charles Pugh, State College farm management specialist, in his mid-year farm costs outlook report.

Feed prices are expected to remain about the same throughout 1959. Pugh said, as high inventories of livestock and poultry offset abundant grain supplies.

Declines in prices of feeder pigs are likely, while continued high demand should maintain the price of feeder cattle through this fall.

Although fertilizer purchases, in North Carolina in early 1959 were up one-third, prices will likely force some farm cost upwards.

For example, a high rate of residential construction will boost price of farm building materials. The steel strike could raise farm machinery prices.

Farm wage rates, interest, and taxes will continue to increase slightly. Pugh expects the increase to be in the neighborhood of 5 per cent.

Carnegie Library Receives New Movie Films

Murphy Carnegie Library has received a new shipment of films that clubs and individuals from this area can borrow for viewing.

The films will be available through Aug. 28.

They are "Lincoln Speaks at Gettysburg," "Mexican Village Family," "Romance of Silk," and "Yours For A Song."

Presbyterian Missionary To Speak Here

The Rev. William F. Junkin, Presbyterian missionary to Formosa, is to speak next Sunday at several services in Murphy.

Mr. Junkin, who is teaching at Tung Hai University at Taichung, will bring the message at morning worship service at Murphy Presbyterian church. At 6:30 Sunday evening he is to meet and counsel with young people of the Presbyterian and First Methodist churches in a supper gathering on the lawn at the rear of the Methodist parsonage.

He will also speak and show slides in the union Methodist-Presbyterian service at First Methodist church at 8 that evening. All are invited to these services.

Mr. Junkin is himself a native of China, his parents having been missionaries there. He returned to that country as a missionary in 1940. After communist drove Christian missionaries from the mainland, Mr. Junkin was one of those who took up service in Formosa, or Taiwan.

13 Agencies Get Licenses To Solicit

During the month of July licenses were granted by the State Board of Public Welfare to thirteen organizations to conduct fund-raising campaigns through public solicitations for the support of their programs. It was announced by Dr.

HOME COMING SET

Homecoming will be celebrated at First Methodist Church Sunday. The public and all singers are invited to attend.

Eliel Winston, commissioner.

The thirteen organizations, which have held licenses for previous solicitation periods, are: American Foundation for Overseas Blind; American Social Hygiene Association; Boy Scouts of America, Cape Fear Area Council; Boy's Clubs of America; Council on Social Work Education; Eye Bank for Restoring Sight; International Rescue Committee; League of Women Voters of North Carolina; Mount Olive Junior College; National Probation and Parole Association; North Carolina Foundation of Church-Related Colleges; Seventh-day Adventists, Carolina Conference; and United Scamens Service.

The amount which the thirteen organizations will seek from the public in North Carolina during the week will be approximately \$26,120.

COLLEGE HINTS

By H. T. ELMO
PITTAHIS AN MAKING PRE-BAKED PIE CRUST—Shrinkage and bubbling can be avoided. Fit pastry lobes into pie plate, with-out stretching; pat out air, and tie bowl to incorporate maximum brick entire crust thoroughly before baking.

Bake crust at 450 degrees for 10 to 12 minutes, to a golden brown. For best results pour a cooled filling into a cooled crust. This will prevent soggy crust.

Cook filling thoroughly. Avoid drafts, do not refrigerate. If you do—both filling and meringue may "weep."

MERINGUE FOR PIES—Beat egg whites in deep medium amount of air. Have egg whites at room temperature and free of any traces of yolk.

Sugar should be added when beating egg whites stand in soft peaks, and are moist and glossy, and have a frothy look.

Baking is important if you want tender meringue temperature must be just right. Bake at 350 degrees—15 to 20 minutes.

WHERE'S THE BEST PLACE TO BUY A USED CAR?

AT YOUR FORD DEALER'S—HIS A-1 USED CARS GIVE YOU A NEW KIND OF PROTECTION* WHEN YOU BUY!

*Every A-1 Used Car is inspected, reconditioned if necessary, and road-tested. And they're warranted in writing by the exclusive new Performance Protection Policy! See cars with the A-1 sticker at your Ford Dealer's Used Car Shopping Center.

A SMALL HOUSE PLANNING BUREAU DESIGN NO. C-489-F

DESIGN C-489-F. This plan is a real answer to storage problems. Each of the four bedrooms has a wardrobe type closet that provides storage from floor to ceiling, and low dresser trays have been built in. More storage can be found in the towel and medicine closet in the bathroom, linen storage in the hall, coat closet in the vestibule, coat and housekeeping closet near the rear entry.

The clean roof line tips a combination of stone veneer, vertical and horizontal siding. Floor area is 1587 square feet, cubage is 30,153 cubic feet.

For further information about DESIGN C-489-F, write the Small House Planning Bureau, St. Cloud, Minn. In Canada, the Small House Planning Bureau of Canada, St. John, New Brunswick.

PUGGY

ARE THESE THE CANDIES YOU WANT?

NO SIR, NOT THOSE!

HOW ABOUT LOLLIPOPS... OR PEANUT CLUSTERS... OR CHOCOLATE BARS...?

OH, NO SIR!

WELL... WHAT DID YOU WANT?

I WANTED TO SEE WHAT I COULD'A BOUGHT IF I HADN'T LOST MY DIME!

THE FIZZLE FAMILY

BUT WHY SHOULD I BUY ACCIDENT INSURANCE? HERES WHY.

ONE MONTH AGO A MAN TOOK OUT A POLICY WITH US!

WELL... THE OTHER DAY HE BROKE HIS NECK AND WE PAID HIM \$4,000!

WHO KNOWS? TOMORROW YOU MAY BE THE LUCKY ONE!
