Switzerland Swiss Cheese Gives Breakfast a Liff

WITH VACATIONS OVER and the youngsters due back to school, it's time for every mother to give her family a sound nutritious start to the day with a good breakfast.

Borrow a tip from the Swiss and make breakfast eggs doubly delicious with Switzerland Swiss cheese, one of the world's great cheeses. Rich in protein, this classic cheese is also a good source of essential minerals and vitamins and adds incomparable flavor. An excellent food buy, Switzerland Swiss cheese is well worth the few extra pennies it costs. We think you'll agree Alpine Eggs will make any breakfast taste better.

- ALPINE EGGS**
- 4 tablespoons light cream
 - 8 eggs
 - Salt and pepper
 - Butter
 - 1/2 cup grated Switzerland Swiss cheese
- Heat oven to 350° F. Butter custard cups or ramekins. Pour 1 tablespoon light cream in each. Break 2 eggs into each. Sprinkle with salt and pepper; dot with butter. Cover with grated Switzerland Swiss cheese. Bake at 350° for about 15 minutes. Makes 4 servings.

Social Security News

By GRADY GRUBBS
Field Representative
For Cherokee County

Some dependent parents who were previously ineligible for monthly benefit payments under the Social Security Act may now qualify under revised rules.

Formerly, upon the death of a son or daughter, a parent claiming dependency was barred from payments if a widow or child of the deceased also survived who could become entitled to any monthly benefits. This restriction was removed by the 1958 Amendments.

Parents who were previously denied benefits because of this restriction may now file claims if they were receiving as much as one-half their total support from the deceased in the one year period just prior to this death. An application must be filed and proof of age and proof of dependency furnished in every case. Retirement ages are 65 for men and 62 for women, but dependent parents under these ages may file proof of dependency prior to attaining retirement age in order to establish their future eligibility.

As a general rule, there is a two-year limit in filing these applications.

For future information, write the Asheville District office, 40 North French Broad, or see the representative who is in Murphy at the Court House every Monday and Tuesday.

Sixty-six per cent of North Carolina farm income is received from the six supported basic crops.

Fifty-seven per cent of North Carolina farm families do not have running water.

Parent's Changing Attitude Is Seen As Helpful To Students' Learning

With the approach of a new school term directing attention to preparing all the children for their annual return to learning, substantial gains in the qualitative results of American education appear to be in the making.

First and most important to these gains is the changing attitude of many parents who not long ago were complaining over the volume of homework assigned their children, and who considered it smart to proclaim openly that they didn't want their youngsters to grow up to be "egg heads."

Return to Fundamentals is Being Urged

Today the clamor is for return to fundamentals, more "learning" and less "method" in teaching, and for greater disciplining of pupils.

Second is the attitude of the youngsters themselves, best reflected from among high school groups by the seriousness with which teenagers are working to qualify themselves for admission to college.

The soul searching in which the nation has been engaging in customary democratic fashion, since Sputnik soared into outer space last fall, has given great impetus to re-evaluation of our system of education and its methods.

School Clothes Aided By Science

Recommended for first consideration of parents, is the home atmosphere in which children will have to apply themselves to study.

Advance Preparations

Of equal importance is the pre-school checkup of the physical well being of the children as insurance against avoidable illness after they start back to school.

Preschool eye examinations are recommended to determine whether corrective measures are necessary.

Finally, there is the need for fitting them out in advance of the school term, with clothes and shoes and school supplies, which, if acquired now during the more leisurely hours of a fading vacation season, can save much time and also money.

159 LBS. U.S.A.
7 LBS. JAPAN

MEAT EATERS—Argentines are the biggest red meat eaters in the world (see drawing). Per capita consumption there was 242 pounds in 1957. The United States produced 18.5 per cent of the world's red meat (beef, veal, pork, mutton, lamb, goat and horse meat) in 1957, but garnered only fifth place in consumption. Of the 13 countries listed by the U.S. Agriculture Department, Japan ranked lowest. Russia's average per person was believed to be around 63 pounds.

WHY DO WITHOUT A LITTLE LUXURY LIKE THIS... LET ALONE THESE BIG CHEVY VIRTUES!

greater roominess
Automobile Manufacturers Association records carry the facts on this. In a Chevy sedan, for example, you've got more front seat head room than all but one of the high-priced cars! And Chevy's front seat hip room spreads up to 5.9 inches wider than comparable cars.

bigger savings
Here's solid proof that Chevrolet squeezes more miles out of a gallon: In the famous Mobilgas Economy Run, two Chevrolet sixes with Powerglide took the first two places in their class. Winning mileage 22.38 m.p.g. And that, friends, took top honors for Chevy from every full-sized car!

full coil ride
You're the expert on ride, so you'll want to try Chevy's easygoing smoothness for yourself. MOTOR TREND magazine can give you a hint of what you're in for: "... the smoothest, most quiet, softest riding car in its price class." And Full Coil springs, of course, never squeak, never need grease.

bigger brakes
Bigger, yes, and built with bonded linings for as much as 66% longer life. And how's this for proof that Chevy's a real stopper: in a NASCAR*-conducted test of repeated stops from highway speeds, Chevrolet outstopped both of the "other two" time after time.

award-winning engines
The NASCAR Outstanding Achievement award goes to Chevrolet! Chevy wins for "the creation and continuing development of America's most efficient V-type engines... for the establishment of new levels of V8 compactness combined with outstanding smoothness." And you can choose among eight V8's and the Six that won the Mobilgas Economy Run for its class.

fresh styling
POPULAR SCIENCE magazine gave Chevy's styling a thoughtful look, then said it this way: "In its price class, Chevy establishes a new high in daring styling..." You'll find your own happy way of saying that Chevy's the only unmistakably modern car in its class.

higher trade-in
N.A.D.A.* Guide Books prove that your Chevrolet will keep its value. Chevy used car prices last year, for example, averaged up to \$128 higher than comparable models of the other two cars in Chevrolet's field.

See how much more Chevy has to offer—visit your local authorized Chevrolet dealer!
